# Ageing Population

**Part of:** [Population](#)

**Related to:** [Cancer](#), [Carers](#), [Ill Health and Disability](#), [Dementia](#), [Coronary Heart Disease](#), [Diabetes](#), [End of Life Care](#), [Stroke](#), [Hypertension](#), [Parkinsons Disease](#), [Healthy Weight](#), [Physical Activity](#), [Osteoporosis](#)

**Key Findings:**

- Key factors include the large 'baby boom' cohort nearing retirement and increased life expectancy.
- After being one of the more rapidly ageing countries in the EU during the 1980s, since the mid-1990s the UK rate has been below the EU average and we are on track to be one of the least aged EU countries by 2035.
- As the 'old age dependency ratio' increases, a proportionally smaller tax base may be stretched to deliver this additional funding.
- An ageing population increases the strain on the NHS, as the cost of providing care for older people is substantially higher.

**Projected Population Growth**

A note on data quality: the ONS Population Projections are based on Census projections reworked in 2012. Therefore, they are the most accurate available. However, these population projections are known to over-estimate the size of the local population.

**The national picture**

The Office for National Statistics (ONS) has updated its projections based on the recent release of data from the 2011 Census, as revised in 2012. In England in 2022, compared to 2012:

- There will be 22% more people aged 65 and over
- There will be 38% more people aged 85 and over <sup>1</sup>

It is estimated that, by 2037, the number of people aged 75 or over in England will have risen from 4.2 million to over 8 million, forming around 13% of the total national population. Almost 15 million people will be aged 65 or over; by comparison, there will be nearly 14

By 2021 the number of people aged 75+ will have increased by 20%

The screenshot shows a Windows Internet Explorer browser window displaying the website <http://www.bathnes.gov.uk/services/your-council-and-democracy/local-research-and-statistics/wiki/cancer>. The browser's address bar shows the URL, and the search bar contains the text 'joint strat'. The page content is as follows:

Home » Services » Your council and democracy » Local research and statistics » Wiki » Cancer

# Cancer

**Part of:** [Ill Health and Disability](#)

**Contains:** [Digestive Cancers - Bowel \(Colorectal\) Cancer and Upper Gastrointestinal \(GI\) Cancer](#), [Lung Cancer](#), [Breast Cancer](#), [Cervical Cancer](#), [Skin Cancer \(Melanoma\)](#), [Prostate Cancer](#)

**Related to:** [Ageing Population](#), [Socio-economic Inequality](#), [Births and Fertility](#), [Mental Health and Illness](#), [Health Checks](#), [Major Causes of Mortality](#), [Smoking](#), [End of Life Care](#), [Healthy Weight](#)

**Key Facts**

- Cancer incidence is increasing in B&NES, from 732 new diagnoses in 1993 to 944 new cases in 2010/11. This rise is in line with regional and national levels.
- There were 4,338 people in 2012/13 (financial year) registered with cancer in GP practises in Bath and North East Somerset, a rate of 2.2% of the registered population.
- Cancer accounts for around a third of all deaths in the area and is the largest contributor of deaths in under 75s, although mortality rates are low compared to similar areas.
- There is a relationship between cancer and [Socio-economic Inequality](#).
- Early indicators suggest that early death rates from cancer, while still below national rates, may not have fallen in line with reductions experienced elsewhere.

Cancer is a common [condition](#) where cells in a specific part of the body grow and reproduce uncontrollably. The cancerous cells can invade and destroy surrounding healthy tissue, including organs. There are over 200 different types of cancer, each with its own methods of diagnosis and treatment. In 2009, 320,467 new cases of cancer were diagnosed in the UK. More than one in three people will develop some form of cancer during their lifetime. <sup>1</sup>

**What does the data say?**

**National Cancer trends <sup>2</sup>**

A 2013 Cancer mortality trends report from Macmillan, looking at existing data back to 1992, makes the following statements about cancer trends and survival to 2020;

The browser's taskbar shows the 'Done' button, several application icons (Internet Explorer, File Explorer, etc.), and the system tray with the time 09:40 and date 27/01/2015. A callout box with a blue arrow points to the 'Part of' link.
