## **2. KEY MESSAGES CONTAINED IN THE AUDIT LETTER**

- 2.1 The Audit Letter notes that Tyne and Wear Fire and Rescue Authority is **Improving Well** and has made significant progress in most areas of performance, although accidental dwelling fires for the year in question remain high. It is worth noting however, that the most recent performance data available for 2008/2009 shows that this situation has improved significantly.
- 2.2 It is also acknowledged that the Authority contributes to wider community outcomes via effective partnership working and uses this involvement to identify communities who are at risk. This is an improvement on the findings of the first Comprehensive Performance Assessment undertaken in 2005.

- 3.2 The Audit Letter also states that the Authority should update its procurement strategies in line with best practice and it also highlights the issues contained within the Rising to the Challenge report.
- 3.3 Finally, the Regional Control Room project is identified as a key risk to the Authority and one that needs to be carefully monitored by Members. These recommendations will be incorporated into an action plan and the work necessary to meet them undertaken accordingly.
