Authority Membership 2013/2014

Chairman

Councillor T. Wright (Sunderland City Council)

Vice-Chairman

Councillor N. Forbes (Newcastle City Council)

Councillors

Sunderland City Council

Councillor M. Forbes

Councillor N. Padgett

Councillor B. Price

Newcastle City Council

Councillor R. Renton

Councillor H. Stephenson

Councillor D. Ahad up to 10th June 2013

Councillor D. Stockdale from 10th June 2013

Gateshead MBC

Councillor G. Haley

Councillor P. Mole

Councillor C. Ord

North Tyneside MBC

Councillor S. Mortimer

Councillor C. Burdis (nee Gambling)

Councillor T. Mulvenna up to 10th June 2013

Councillor J.L.L. Harrison from 10th June 2013

South Tyneside MBC

Councillor J. Bell

Councillor H.E. McAtominey up to 23rd June 2014

Councillor J. Perry from 23rd June 2014

Independent Members

Mr G.N. Cook

Mr J.P. Paterson up to
24th June 2013

Miss G.M. Goodwill

Mr M. Knowles from

17th March 2014

Chief Officers

T. Capeling, Chief Fire Officer

M. Page, CPFA MBA, Finance Officer up to November 2013

S. Tognarelli, Finance Officer from December 2013

D. Smith, Clerk to the Authority

Introduction

We are pleased to present the Statement of Accounts for the year 2013/2014 for the Tyne and Wear Fire and Rescue Authority. A published and audited Statement of Accounts is at the heart of ensuring proper accountability for the use of local and national taxpayers money. We recognise, however, that the Authority's accounts can only tell part of the story. The Authority needs to demonstrate that it is aiming to operate to the highest standard of conduct in accordance with the principles of Corporate Governance and continues to have a robust system of internal control in place.

With regard to Corporate Governance, the Authority considers, annually, a review of its Code of Corporate Governance. A report on the annual review was received at a full meeting of the Authority in June 2014. The Code follows the framework recommended by CIPFA / SOLACE and the review specifically assesses the Authority's arrangements for compliance with the Code, which identifies the underlying principles of Corporate Governance – openness and inclusivity, integrity, and accountability. The review found that the Authority continues to have robust and comprehensive arrangements in place but has identified a small number of areas for improvement and development, which will be acted upon during 2014/2015.

In line with guidance issued by CIPFA, the Authority operates a Governance Committee to take on the remit of an Audit Committee. The role of this Committee involves not only approving the Statement of Accounts, but also reviewing arrangements for areas such as risk management, treasury management, the wider internal control environment and also consideration of internal and external audit plans, progress reports and annual reports.

Elsewhere within the Statement of Accounts, an Annual Governance Statement has been included, which confirms that there are sound systems of Internal Control in place. We will also continue to ensure action is taken, where necessary, to maintain and develop the system of Internal Control for the Authority in the future.

Tom Capeling
Chief Fire Officer

Sonia Tognarelli
Finance Officer

Dave Smith
Clerk to the Authority

Dated: 30th June 2014

Certification of the Statement of Accounts

Statement of Accounts 2013/2014 (Subject to Audit) Certification by the Responsible Finance Officer

As the Tyne and Wear Fire and Rescue Authority's Responsible Finance Officer, I hereby certify that in accordance with the Accounts and Audit Regulations 2011 Regulation 8(1) the Statement of Accounts for 2013/2014 (subject to audit) presents a true and fair view of the financial position of Tyne and Wear Fire Authority as at 31st March 2014 and its income and expenditure for the year then ended.

Mrs S Tognarelli
Finance Officer

Dated: 30th June 2014

Audited Statement of Accounts 2013/2014 Certification on behalf of those charged with governance

As Chairman of the Governance Committee held on 29th September 2014, I hereby acknowledge receipt of the audited Statement of Accounts for 2013/2014 by this Committee, in accordance with the Accounts and Audit Regulations 2011 Regulation 8(3)(a), and confirm that the Statement of Accounts was approved at the Governance Committee of 29th September 2014 in accordance with sub-paragraph 8 (3) (b) with regard to the aforementioned Regulations.

Mr G.N Cook
Chairman of the Governance Committee

Dated: 29th September 2014

Audited Statement of Accounts 2013/2014 Certification by the Responsible Finance Officer

As the Authority's Responsible Finance Officer, I hereby re-certify the audited statement of accounts for 2013/2014 in accordance with Regulation 8 (1) of the Accounts and Audit Regulations 2011.

Mrs S Tognarelli
Finance Officer

Dated: 29th September 2014

Foreword by the Finance Officer

This Statement of Accounts shows, in the following pages, the Authority's final accounts for 2013/2014. It has been prepared in accordance with the 'Code of Practice on Local Authority Accounting in the United Kingdom 2013/2014' and is based on International Financial Reporting Standards (IFRS), known more commonly as the Code. The Code constitutes 'proper accounting practice' under the terms of the Accounts and Audit Regulations 2011, and the Local Government and Housing Act 1989.

Certain financial statements are required to be prepared under the Code of Practice as follows:

1. **Statement of Responsibilities**
This discloses the respective responsibilities of the Authority and the Finance Officer.
2. **Movement in Reserves Statement (MiRS)**
This statement shows the movement in the year on the different reserves held by the Authority, analysed into 'usable reserves' (i.e. those that can be applied to fund expenditure or reduce local taxation) and other non-usable reserves.
3. **Comprehensive Income and Expenditure Statement**
This statement shows the accounting cost in the year of providing services in accordance with generally accepted accounting practices, rather than the amount to be funded from taxation. Authorities raise taxation to cover expenditure in accordance with regulations; this may be different from the accounting cost. The taxation position is shown in the Movement in Reserves Statement.
4. **Balance Sheet**
The Balance Sheet shows the value at the Balance Sheet date of the assets and liabilities recognised by the Authority. The net assets of the Authority (assets less liabilities) are matched by reserves held by the Authority.
5. **Cash Flow Statement**
The Cash Flow Statement shows the changes in cash and cash equivalents of the Authority during the reporting period.
6. **Notes (including a summary of significant accounting policies and other explanatory information)**
The Notes to the financial statements have three significant roles. They:
 - present information about the basis of preparation of the financial statements and the specific accounting policies used.
 - disclose information that is required by the Code that is not presented elsewhere in the financial statements.
 - disclose information that is not presented elsewhere in the financial statements but is relevant to an understanding of them.
7. **Supplementary Statements**
Firefighters' Pensions – Fund Account, Net Assets Statement and Notes
These statements summarise the transactions and the net assets relating to the Firefighters' Pension Fund, which are required to be reported separately within the Statement of Accounts for the Authority.

Foreword by the Finance Officer (continued)

Revenue Expenditure and Income Summary

The estimated net revenue expenditure for 2013/2014 to be met from Government Grants and local taxpayers was approved by the Authority at £53.330 million. This meant that the precept, at the Band D level of Council Tax, after allowing for Revenue Support Grant and National Non Domestic Rates receipts, was set at £73.16 for 2013/2014. This represented a Council Tax freeze for the third successive year.

The following table summarises the financial position for the year:

	2013/2014 Original Estimate £000	2013/2014 Revised Estimate £000	2013/2014 Actual Outturn £000	2012/2013 Actual Outturn £000
Community Safety	6,426	6,893	6,266	6,878

* DSO and other balances transferred in to General Fund balance during the year.

Foreword by the Finance Officer (continued)

Comprehensive and detailed budget monitoring is carried out monthly during the year and is supplemented by formal budget monitoring reports which are made quarterly to the full Authority. These detail the outcome of the review of budgets and spending forecasts for both capital and revenue expenditure and also include a review of certain other key financial items including Treasury Management and Prudential Indicators. Again this reflects strong and robust financial management in 2013/2014 continuing the Authority's strong track record in this regard.

The Revenue Budget Outturn for 2013/2014 showed a net underspend of £1.618m, at £51.712m compared with an original budget of £53.330m. This is made up of the following:

- Employee costs – a net underspend of £0.713 million due to continuation of the Authority's vacancy management policy across all areas of the service in line with staffing reviews, along with lower salary costs for Control Room staff due to changes in part time working arrangements and reduced sickness absences;
- Firefighter ill health retirements – an underspend of £0.151 million as no ill health retirements were made during the year;
- Premises – an underspend of £0.152 million due to a saving on the annual lease at Rainton Bridge following purchase of the site and reduced utility budgets from the Authority's proactive policy and actions taken to lower its carbon emissions, together with the impact of lower power bills because of the milder winter;
- Transport – an underspend of £0.195 million, primarily due to savings on the leasing budget as vehicles were purchased outright, along with sustained lower fuel costs and reduced levels of repairs and maintenance during the year;
- Supplies and Services – a £0.190 million underspend, the main reasons included a £78,000 reduction in operational equipment due to an unexpected fall in demand for fire hydrants and associated equipment from building developers; an underspend of £47,000 on uniforms and personal protective equipment due to delays in issuing clothing items, and an underspend of £22,000 due to delays in purchasing items while awaiting evaluation of new technology for medical equipment;
- Contingencies – an underspend of £0.618 million as the pay award and pension increase costs were met from existing budgets and there was no requirement for the leasing costs provided for due to a freeze on purchase of new vehicles pending the vehicle fleet review;
- Other minor overspendings of (£0.004) million;
- Less planned use of reserves of (£0.482) million was required overall in the year to support the budget and was in the main a reflection of strong financial management and costs being lower than anticipated. This was further helped by a reduction in insurance costs and a lower assessment of insurance liabilities along with some year end technical transfers in connection with PFI;
- Income – an underachievement of (£0.099) million due to a lower take up on training courses and community safety activities;
- Additional grant funding – £0.184 million additional government grant was received late in the year in respect of funding the extension of the small business rates rebate scheme and an additional allocation of Grant which returned a share of the government's top slice for capitalisation funding to all authorities.

As agreed by the Authority on 23rd June 2014, the total underspend will be appropriated to the Development Reserve. This will replenish the reserve to be used strategically to identify areas of one-off spend, which will help reduce the revenue budget on an ongoing basis in recognition of the continued trajectory of government funding reductions which are now expected up until 2017/2018 at least but could be extended to possibly 2020 according to the Chancellor.

However, when the accounts were finalised a number of small adjustments were necessary resulting in a further net underspend of £0.439m. These related to late accounting entries in respect of PFI, leasing and confirmation of the DSO surplus for the year. It has been agreed that this variation is also transferred to the Development Reserve. This is reflected in the accounts presented.

Foreword by the Finance Officer (continued)

The table on page 6 shows an overall net position on the General Fund Balance as reported at the Authority meeting in June 2014. The General Fund Balance of the Authority, as at 31st March 2014, therefore remains at £3.872 million.

Trading Account (Cleaning DSO)

The Authority operates a trading account for its Cleaning function, which came into operation in 1989. Following the abolition of Compulsory Competitive Tendering, with effect from January 2000, there is no longer a statutory requirement to achieve a rate of return. The Cleaning DSO needs to demonstrate Best Value and one method of showing this is through setting and achieving a requirement to break even.

In 2013/2014, the Cleaning DSO recorded a trading surplus of £38,668 (£31,459 excluding adjustments for IAS19 costs) in comparison to £37,136 in 2012/2013 (£35,406 excluding adjustments for IAS19 adjustments). The surplus for 2013/2014 has been added to surpluses accumulated by the DSO in earlier years and forms part of the General Fund balance of the Authority. This position is detailed further at Note 27 on page 66.

Capital Expenditure and Income

The Authority approved a capital programme for 2013/2014 of £3.448 million, which was subsequently revised to £4.072 million during the year. Actual expenditure for the year was £2.339 million, financed from a combination of revenue contributions of £0.245 million, grant funding of £1.780 million and earmarked reserves of £0.314 million.

The main reasons for the variation in spending of £1.733 million have arisen due to the following:

- expenditure on a number of projects planned for 2013/2014 of £1.669 million that has slipped into 2014/2015:
 - Delayed completion of the Network and Communications Infrastructure project awaiting contractors to install new circuitry;
 - Delayed delivery of the HR/MIS software;
 - Delays in the procurement and tender processes for the LED lighting project;
 - Deferred payment of the final milestone payment for the Control/Mobilising system, and
 - Re-profiling of the Estates Development Strategy Works;
- net underspending of £0.078 million on the Vehicle Replacement Programme due, in the main, to the acquisition of a number of new water tenders which came in under budget;
- net underspendings on a number of schemes completed during the year of £0.057million; and
- acceleration of £0.071 million from the 2014/2015 Capital Programme mainly to cover payment of components for replacement IT hardware that were delivered earlier than required.

Authority's Current Borrowing and Capital Borrowing Provision

The Capital Programme report, incorporating the Prudential Indicators and the Treasury Management Strategy, was submitted to the Authority meeting on 18th February 2013, which detailed the 2013/2014 borrowing limits for the Authority. All borrowing is undertaken by the Lead Authority (Sunderland City Council) on the Authority's behalf.

The specific borrowing limits set each year relates to two of the Prudential Indicators required under the Prudential Code, which was introduced from 1st April 2004.

- Authorised Limit for External Debt for 2013/2014 of £55.383 million;
- Operational Boundary for External Debt for 2013/2014 of £50.383 million.

The Lead Authority administers all of the Authority's borrowing through its Consolidated Advances and Borrowing Pool (CABP). The above two statutorily required Prudential Indicators are monitored on a daily

Foreword by the Finance Officer (continued)

basis and neither limit has been exceeded during 2013/2014. The highest level of external debt incurred by the Authority during 2013/2014 was £38.460 million on 1st April 2013. This includes £24.177 million in relation to the Authority's long term liabilities (consisting of its PFI Schemes commitments and finance leases) which forms part of both borrowing limits in order to comply with IFRS accounting requirements.

Private Finance Initiative (PFI)

The Authority entered into a contract on 28th March 2003 to provide facilities at 6 new Community Fire Stations, a Service Headquarters and a new Technical Services Centre. These PFI facilities are located on more effective sites, designed and located to meet the Authority's strategic objectives. Improved community outcomes are being delivered through better engagement with communities through these facilities and the scheme has enabled a major redesign of service delivery. The contract expires on 2nd May 2029 when all of the facilities will become the assets of the Authority.

The Authority continues to closely monitor the costs of the PFI scheme in order to challenge and review the ongoing costs of the scheme and has commissioned an independent study to help negotiate lower costs.

More recently (June 2009), the Authority entered into a separate and collaborative PFI contract with Northumberland FRA and Durham and Darlington FRA to provide a new Community Fire Station at Tynemouth. The North East Fire and Rescue Authority (NEFRA) contract expires in May 2035 and the Authority's share of the costs of the scheme are included within its financial statements.

Accounting for Pensions

International Accounting Standard 19 (IAS19)

The Authority's accounts continue to be compliant with International Accounting Standard 19 (IAS19, formally known as FRS17). Although IAS19 is a complex accounting standard it is based on a simple principle, namely that an organisation should account for retirement benefits when it is committed to giving them, even if the actual payment of those benefits will be many years into the future. Inclusion of the pension fund assets and liabilities in the accounts does not mean that the legal title or obligation has passed from the Pension Fund Administrator to the employer. Instead it represents the employer's commitment to increase contributions to make up any shortfall in attributable net assets, or its ability to benefit (through reduced contributions) from a surplus in the Pension Fund.

The last full actuarial valuation of the Pension Fund was carried out as at 31st March 2013 and has been updated by independent actuaries to take into account the requirements of IAS19 in order to assess liabilities as at 31st March 2014. The Authority as such continues to comply fully with this Standard and the Accounting Policy 1.13 on pages 39 to 41 and the Notes to Core Financial Statements provide details of the necessary disclosures required.

The net overall impact of IAS19 accounting entries is neutral in the accounts, and, in reality, as the Authority is making the necessary pension deficiency payments to address any assessed shortfall in the pension fund by the Actuary over time, then the Balance Sheet net worth is in effect being distorted by future years deficits, which are being addressed.

The financial health of the Authority is consequently being affected by the accounting requirements in respect of IAS19. However, the Pension Fund Reserve Deficit reflected in the Balance Sheet on Page 29, as assessed by the Actuary, as at 31st March 2014, is being addressed by the Authority in line with government regulations whereby a period of 22 years to correct the deficit position has been agreed. The Authority can meet the assessed deficit with planned and agreed future years contributions based on independent actuarial advice.

The Hutton Review, has seen changes to public sector pensions as a result of the core scheme arrangements being revised which will support the reduction/stabilisation of the employer's costs of funding pensions for public sector workers in future years. These changes were implemented from 1st April 2014.

Foreword by the Finance Officer (continued)

Arrangements for Funding and Accounting for Firefighter Pensions

From 1st April 2006, revised arrangements came into effect for funding firefighter pensions, with Fire and Rescue Authorities administering and paying firefighters' pensions through a local firefighters' pension fund. Together, employee and employer contributions meet the accruing pension liabilities of currently serving firefighters, meaning that Fire and Rescue Authorities meet all of the costs of employing a firefighter, including the cost of future pension liabilities, at the time of employing them.

Ill-health costs are paid by the Authority from its pension fund. Employer payments towards the future cost of ill-health retirements come from a combination of a flat rate employer contribution applicable to all authorities and from an individual charge payable by the relevant Authority where an ill-health retirement occurs. The Authority has invested in health awareness and intervention measures through its Occupational Health Unit and it is pleasing to report that there have been only two firefighter ill health retirements since 2009/2010.

Employee and employer contributions are paid into the pension fund each year, with the fund being topped up by annual Government grant if the contributions are insufficient to meet the cost of pension payments. Any surplus is recouped by the Government. The pension fund is ring-fenced to ensure accounting clarity. As such, a Pensions Fund Account and Net Assets Statement are reported as separate supplementary financial statements within the Authority's Statement of Accounts.

Major Acquisitions, Capital Works and Disposals during 2013/2014

Acquisitions and Capital Works

The Authority is involved in a number of major capital works projects. The main schemes are listed below, for information, together with the amounts of expenditure incurred during 2013/2014, the total estimated gross cost of each scheme, and the status of the project at the end of the financial year.

Scheme / Project	Expenditure During 2013/2014 £000	Total Estimated Scheme Costs £000	Completed / In Progress as at 31st March 2014
Command and Control Project	1,300	2,685	In Progress
Estates Development Strategy	0	6,249	In Progress

Disposals

There have been no disposals during 2013/2014.

Revaluation of Fixed Assets

A number of the Authority's non-PFI fire stations have been subject to revaluation in the year as part of the five year rolling revaluation programme and, as at 1st April 2013, totalled £23.1m, a reduction in the fair value of £3.711m. This is shown on the face of the Comprehensive Income and Expenditure Account but has no monetary impact to the Authority. It is important to note that the value included in the accounts can only act as an indicator of the Authority's assets and the only way of assessing their true market value would be on disposal of the assets.

Euro

The adaptation of operational and information systems to accommodate the euro may become a priority for local authorities at some stage in the future. The Authority continues to assess the euro's potential impact on

Foreword by the Finance Officer (continued)

its business affairs. The Authority's Financial Management System however is euro compliant.

Efficiency

The Authority produces a fully costed Integrated Risk Management Plan (IRMP) which reflects local needs and sets out plans to effectively tackle existing and potential risks to communities. The IRMP was brought in line with the Medium Term Financial Strategy (MTFS) to assist with managing the cuts in government funding. The previous IRMP actions (2010-2013) have now been implanted and have realised significant savings of £6.398million. A set of new actions were built in to the IRMP for the period 2013-2016 and these will be implemented over the next three years to generate further efficiencies.

In addition, the Authority is committed to regularly delivering further efficiency savings through:

- following best practice in relation to procurement of goods and services;
- working in collaboration with partners both locally and regionally where practical;
- carrying out regular base budget reviews; and
- continuing policy and service reviews.

Annual Report and Summary Statement of Accounts

The Authority publishes an Annual Report to highlight its successes over the previous twelve months, including its performance against national indicators and the opinions of external inspectors, as well as outlining details of the improvements introduced to meet the Authority's vision of "Creating the Safest Community".

The latest Annual Report includes a summary of the Statement of Accounts, designed to encourage more people to take an interest in the Authority's financial position in an easy to read format. Further details can be found on the Authority's website at www.twfire.gov.uk.

Authority Performance

The Authority's key strategic priority is to prevent loss of life and injury from fires and other emergencies. In order to achieve this goal, wide ranging community safety services, legislative fire safety services and operational response services are provided to the public of Tyne and Wear. The primary focus is to prevent fires and other emergencies from occurring, whilst also ensuring that if they do occur, every attempt is made to limit their impact.

The primary mechanism for achieving this is through the Authority's Strategic Community Safety Plan, which is focused on improving overall community safety through the more effective and efficient use of resources to drive down incidents and respond to them more effectively.

In addition, the Authority continues to work with local schools, businesses, residents and community groups with the overall aim of reducing the risk of injuries and death from fire. The main thrust of community safety, however, is targeted home safety checks, which involve community firefighters and Prevention and Education staff visiting homes to deliver fire safety advice and, where necessary, fitting smoke detectors. During 2013/2014, the Service carried out 31,268 home safety checks (30,578 in 2012/2013) and attended a total of 15,523 incidents (14,771 in 2012/2013).

There were five fatalities from all fires during 2013/2014, compared to none being reported in the previous year. Despite this, the Service continues to have the lowest number of fatalities from all fires compared to the other Metropolitan Fire and Rescue Services.

In 2013/2014 the Authority reported positive performance and improved on a number of key areas relating to operational and organisational performance. This performance is supported by a 17% reduction in injuries from accidental dwelling fires, excluding precautionary checks, (58 in 2013/2014 compared to 70 in 2012/2013), and a 4% reduction in primary fires excluding primary road vehicle fires (1,129 in 2013/2014 compared to 1,178 in 2012/2013).

Foreword by the Finance Officer (continued)

Primary fires reduced by 6% in 2013/2014 when compared to the previous year from 1,701 to 1,598. This continues to show a year on year improvement for the seventh successive year.

In 2013/2014 569 accidental fires in the home were attended which is a 3% reduction from the previous year (589).

Other key areas of improvement when compared with 2012/2013 include:

- 8% reduction of false alarms due to automatic fire detection in non-domestic premises.
- 7% (143) fewer Special Services.
- 10% reduction in malicious false alarms attended.

Planned Future Developments

Estates Development Plan

The Authority is undertaking a major review of its property portfolio in conjunction with the Lead Authority and its partners, in response to a range of emerging issues, including:

- the continued alteration of premises to ensure that facilities continue to comply with the issues of equality, diversity, dignity and health and safety;
- modifications to buildings in order to minimise carbon emissions; the requirement to comply with organisational targets to reduce Carbon footprint, and to conserve more energy;
- continued modifications to the estate with a proactive preventative maintenance programme to ensure that buildings are of a suitable, modern and acceptable standard in order to best deliver services;
- on-going work for the future replacement of two community fire stations in the Sunderland district to comply with meeting the needs of delivering a modern and cost effective service.

The Authority has retained a Development Reserve to assist in funding the outcome of this major review of the property portfolio over the medium to long term, and specific earmarked reserves have been established to address issues arising from the Carbon Management Plan and equality and diversity measures.

New Command and Control Centre

The Authority saw the completion of the Command and Control Centre which is now based at Brigade Headquarters and became operational from 25th November 2013. The facility includes both a new mobilising Command and Control System along with the staff of the Control Room who transferred to the HQ site as a result of its relocation from West Denton. The Authority expects the project to be delivered on budget and continues to work with its system provider to ensure that the system delivers its full capability and benefit for the Authority and good progress has been made in this respect. This facility is the first such facility to go live in the country delivering the end to end process envisaged by the previous government's Regional Control Centre initiative.

Foreword by the Finance Officer (continued)

Financial Outlook for the Authority

In December 2013, the Government announced a two year finance settlement covering 2014/2015 and 2015/2016. The settlement continued to follow the new business rates retention funding arrangement introduced for 2013/2014, which the Government stated was based more on self determination and financial independence, and a move towards authorities that strive to do better being rewarded with increased revenue funding.

Under the arrangements, 50% of the Business Rates collected are retained by local authorities and 50% are passed over to the government and in effect transfers some of the risk of business rates collection locally. The Fire Authority receives 2% of the 50% share collected by its 5 district councils of Tyne and Wear.

As indicated in the 2013 Autumn Statement, the government has capped business rates at a 2% increase rather than using RPI of 3.2%. An additional grant was allocated in both 2014/2015 and 2015/2016 to compensate for this policy change.

The Government has retained the safety net threshold for each authority to limit the losses on Business Rates income collected in any one year. This has however been increased to £12.806m based on the Authority's local share funding baseline figure of £13.845m.

The Government has retained the threshold council tax limit to hold a referendum at 2% in 2014/2015. This measure reduces the flexibility available to the Authority in considering options to fund the budget. In addition the Government has confirmed that Council Tax Freeze grant funding (based on a 1% council tax increase) for both 2014/2015 and 2015/2016 will be made available to those that freeze council tax in both these years.

The Authority continues to face a disproportionately greater reduction in funding compared to most other Fire Authorities and the more deprived areas, mainly the Metropolitan Fire Authorities, continue to see the highest level of overall cuts to their future funding allocations unless a review of the system is carried out to address in particular a diminishing resource equalisation weighting in the current methodology.

The key elements of the Authority's settlement for 2014/2015 are:

- A reduction in the Government's Revenue Spending Power of £2.077m or 3.8% to £52.302m, compared to an adjusted 2013/2014 position of £54.379m.
- The bulk of the cut is in respect of a reduction in the Settlement Funding Assessment (SFA) of £2.572m or 7.5%.
- Provision of a 1% Council Tax Freeze Grant of £0.241m for 2014/2015.
- A minor increase of £0.028m in other revenue grants (Firelink Initiatives and New Dimensions).
- An additional grant of £0.300m to fund the 1.2% gap between the capped business rates of 2% and RPI of 3.2% (the SFA adjustment) and other business rate concessions.

The Authority's indicative Revenue Spending Power for the following year, in 2015/2016, is also expected to reduce, by a further 4.5% or £2.352m in cash terms to £49.949m. This means government reductions in funding will be over £4.4m over the next two years which does not take in to account service spending pressures or the costs of inflation over this period.

Also the Chancellor indicated in his recent 2014 Budget that cuts to government funding will now extend to 2017/2018 despite an upturn in the economy during the last year and indicated that they may be prolonged even further to possibly 2020 in order for the government to build up a small budget surplus. The financial outlook for the Authority in this likely scenario therefore remains very challenging with further significant reductions expected year on year based upon a similar trajectory of funding reductions .

Against this context of significant and continuing grant reductions, the Authority has published a revised Medium Term Financial Strategy (MTFS), which covers the period 2014/2015 to 2016/2017, to:

Foreword by the Finance Officer (continued)

- provide an analysis of the financial position likely to face the Authority over the medium term and establish approaches to address the Strategic Priorities of the Authority as set out in the current Integrated Risk Management Plan which will achieve value for money in the use of those resources;
- in light of the medium term financial position which the Authority is likely to face, to update the Budget Planning Framework for the preparation of Revenue and Capital Budgets, that are balanced and affordable respectively.
- set out actions to be taken in the short to medium term to mitigate against the significant grant reductions already detailed and to prepare for the additional grant reductions expected in the next 4 year period to 2017/2018.

In light of the anticipated prolonged funding reductions, the Authority will need to consider further cost saving options. Approval was given at a meeting of the Fire Authority in January 2013 to start implementing a number of the further actions set out the Integrated Risk Management Plan (IRMP) 2013-2016. The Fire Authority has reported a number of actions that have been agreed and which will commence from 2014/15, most notably the agreed Fire Response Cover Model. To recognise that the approved actions from the IRMP will take time to implement, the Authority has factored in use of at least £6 million of its earmarked reserves to address the anticipated budget funding gap in the period of its implementation.

On a positive note, the Authority has an excellent track record of delivering efficiencies and, through the actions set out in its revised MTFS and IRMP, remains in a good position financially to meet the continuing challenges.

Sonia Tognarelli
Finance Officer

Dated: 30th June 2014

Statement of Responsibilities for the Statement of Accounts

The Authority's Responsibilities

The Authority is required to:

- make arrangements for the proper administration of its financial affairs and to secure that one of its officers has the responsibility for the administration of those affairs. In this Authority, that officer (the Finance Officer) is the Head of Financial Resources of the Lead Authority (Sunderland City Council);
- manage its affairs to secure economic, efficient and effective use of resources and safeguard its assets;
- approve the Statement of Accounts.

The Finance Officer's Responsibilities

The Finance Officer is responsible for the preparation of the Authority's Statement of Accounts which, in terms of the CIPFA/LASAAC Code of Practice on Local Authority Accounting in the United Kingdom ('the Code'), is required to show a true and fair view of the financial position of the Authority at the accounting date and its income and expenditure for the year ended 31st March 2014.

In preparing this Statement of Accounts, the Finance Officer has:

- selected suitable accounting policies and then applied them consistently;
- made judgements and estimates which were reasonable and prudent;
- complied with the Code, except where disclosed.

The Finance Officer has also:

- kept proper accounting records, which were up to date;
- taken reasonable steps for the prevention and detection of fraud and other irregularities.

The unaudited accounts were authorised for issue on 30th June 2014.

Sonia Tognarelli
Finance Officer

Dated: 30th June 2014

Independent Auditor's report to the Members of Tyne and Wear Fire and Rescue Authority

Opinion on the Authority financial statements

We have audited the financial statements of Tyne & Wear Fire and Rescue Authority for the year ended 31 March 2014 under the Audit Commission Act 1998. The financial statements comprise the Movement in Reserves Statement, the Comprehensive Income and Expenditure Statement, the Balance Sheet, the Cash Flow Statement, the Firefighters' Pension Fund Account and the Firefighters' Pension Fund Net Assets Statement and the related notes. The financial reporting framework that has been applied in their preparation is applicable law and the CIPFA/LASAAC Code of Practice on Local Authority Accounting in the United Kingdom 2013/14.

This report is made solely to the members of Tyne & Wear Fire and Rescue Authority in accordance with Part II of the Audit Commission Act 1998 and for no other purpose, as set out in paragraph 48 of the Statement of Responsibilities of Auditors and Audited Bodies published by the Audit Commission in March 2010.

Respective responsibilities of the Finance Officer and auditor

As explained more fully in the Statement of Responsibilities for the Statement of Accounts the Finance Officer is responsible for the preparation of the Statement of Accounts, which includes the financial statements, in accordance with proper practices as set out in the CIPFA/LASAAC Code of Practice on Local Authority Accounting in the United Kingdom, and for being satisfied that they give a true and fair view. Our responsibility is to audit and express an opinion on the financial statements in accordance with applicable law and International Standards on Auditing (UK and Ireland). Those standards require us to comply with the Auditing Practices Board's Ethical Standards for Auditors.

Scope of the audit of the financial statements

An audit involves obtaining evidence about the amounts and disclosures in the financial statements sufficient to give reasonable assurance that the financial statements are free from material misstatement, whether caused by fraud or error. This includes an assessment of: whether the accounting policies are appropriate to the Authority's circumstances and have been consistently applied and adequately disclosed; the reasonableness of significant accounting estimates made by the Finance Officer; and the overall presentation of the financial statements. In addition, we read all the financial and non-financial information in the explanatory foreword to identify material inconsistencies with the audited financial statements. If we become aware of any apparent material misstatements or inconsistencies we consider the implications for our report.

Opinion on financial statements

In our opinion the financial statements:

- give a true and fair view of the financial position of Tyne & Wear Fire and Rescue Authority as at 31 March 2014 and of its expenditure and income for the year then ended; and
- have been prepared properly in accordance with the CIPFA/LASAAC Code of Practice on Local Authority Accounting in the United Kingdom 2013/14.

Opinion on other matters

In our opinion, the information given in the explanatory foreword for the financial year for which the financial statements are prepared is consistent with the financial statements.

Independent Auditor's report to the Members of Tyne and Wear Fire and Rescue Authority (continued)

Matters on which we report by exception

We report to you if:

- in our opinion the annual governance statement does not reflect compliance with 'Delivering Good Governance in Local Government: a Framework' published by CIPFA/SOLACE in June 2007 and the December 2012 addendum;
- we issue a report in the public interest under section 8 of the Audit Commission Act 1998;
- we designate under section 11 of the Audit Commission Act 1998 any recommendation as one that requires the Authority to consider it at a public meeting and to decide what action to take in response; or
- we exercise any other special powers of the auditor under the Audit Commission Act 1998.

We have nothing to report in these respects.

Conclusion on Authority's arrangements for securing economy, efficiency and effectiveness in the use of resources

Respective responsibilities of the Authority and the auditor

The Authority is responsible for putting in place proper arrangements to secure economy, efficiency and effectiveness in its use of resources, to ensure proper stewardship and governance, and to review regularly the adequacy and effectiveness of these arrangements.

We are required under Section 5 of the Audit Commission Act 1998 to satisfy ourselves that the Authority has made proper arrangements for securing economy, efficiency and effectiveness in its use of resources. The Code of Audit Practice issued by the Audit Commission requires us to report to you our conclusion relating to proper arrangements, having regard to relevant criteria specified by the Audit Commission.

We report if significant matters have come to our attention which prevent us from concluding that the Authority has put in place proper arrangements for securing economy, efficiency and effectiveness in its use of resources. We are not required to consider, nor have we considered, whether all aspects of the Authority's arrangements for securing economy, efficiency and effectiveness in its use of resources are operating effectively.

Scope of the review of arrangements for securing economy, efficiency and effectiveness in the use of resources

We have undertaken our audit in accordance with the Code of Audit Practice, having regard to the guidance on the specified criteria, published by the Audit Commission on 1 November 2012, as to whether the Authority has proper arrangements for:

- securing financial resilience; and
- challenging how it secures economy, efficiency and effectiveness.

The Audit Commission has determined these two criteria as those necessary for us to consider under the Code of Audit Practice in satisfying ourselves whether the Authority put in place proper arrangements for securing economy, efficiency and effectiveness in its use of resources for the year ended 31 March 2014.

Independent Auditor's report to the Members of Tyne and Wear Fire and Rescue Authority (continued)

We planned our work in accordance with the Code of Audit Practice. Based on our risk assessment, we undertook such work as we considered necessary to form a view on whether, in all significant respects, the Authority had put in place proper arrangements to secure economy, efficiency and effectiveness in its use of resources.

Conclusion

On the basis of our work, having regard to the guidance on the specified criteria published by the Audit Commission on 1 November 2012, we are satisfied that, in all significant respects, Tyne & Wear Fire and Rescue Authority put in place proper arrangements to secure economy, efficiency and effectiveness in its use of resources for the year ended 31 March 2014.

Certificate

We certify that we have completed the audit in accordance with the requirements of the Audit Commission Act 1998 and the Code of Audit Practice issued by the Audit Commission.

Annual Governance Statement

SCOPE OF RESPONSIBILITY

Tyne and Wear Fire and Rescue Authority (the Authority) is responsible for ensuring that its business is conducted in accordance with the law and proper standards, and that public money is safeguarded and properly accounted for, and used economically, efficiently and effectively. The Authority also has a duty under the Local Government Act 1999 to make arrangements to secure continuous improvement in the way in which its functions are exercised, having regard to a combination of economy, efficiency and effectiveness.

In discharging this overall responsibility, the Authority is responsible for putting in place proper arrangements for the governance of its affairs, facilitating the effective exercise of its functions, which includes arrangements for the management of risk.

The Authority has had a Code of Corporate Governance in place since 2003, revised during 2013/14. The Authority has approved and adopted a code of corporate governance, which is consistent with the principles of the CIPFA/SOLACE Framework *Delivering Good Governance in Local Government*. The revised Code is available on the Authority's website (www.twfire.gov.uk) or can be obtained from the Fire and Rescue Service Headquarters.

This Statement explains how the Authority has complied with the code and also meets the requirements of regulation 4(2) of the Accounts and Audit (England) Regulations 2011 in relation to the publication of a statement of internal control.

THE PURPOSE OF THE GOVERNANCE FRAMEWORK

The governance framework primarily includes systems and processes and culture and values by which the Authority directs and controls its activities and engages with the community. It enables the Authority to monitor the achievement of its strategic objectives and to consider whether those objectives have led to the delivery of appropriate, cost-effective services.

The system of internal control is a significant part of that framework and is designed to manage risk to a reasonable level. It cannot eliminate all risk of failure to achieve policies, aims and objectives and can therefore only provide reasonable and not absolute assurance of effectiveness. The system of internal control is based on an ongoing process designed to identify and prioritise the risks to the achievement of the Authority's policies, aims and objectives, to evaluate the likelihood of those risks being realised and the impact should they be realised, and to manage them efficiently, effectively and economically.

The governance framework has been in place at the Authority for the year ended 31 March 2014 and up to the date of approval of the Annual Report and Statement of Assurance and Statement of Accounts.

Annual Governance Statement (continued)

THE GOVERNANCE FRAMEWORK

There is a clear vision of the Authority's purpose and intended outcomes for service users that is clearly communicated, both within the organisation and to external stakeholders:

- The Strategic Community Safety Plan draws together a shared vision, principles for action and priorities (strategic objectives). For each strategic objective, key targets have been identified. The Plan sets out explicitly the key actions and performance targets for the future, and these are clearly linked with departmental/district service plans and resources. The Plan outlines the Authority's roles and responsibilities, the context in which it operates, what the strategic priorities and improvement objectives are, how the Authority will realise its vision, what its performance improvement and monitoring arrangements are, performance indicators and a financial overview. The financial overview section provides background commentary to the issues the Authority has considered in setting the budget and in preparing the Medium Term Financial Strategy.
- The Strategic Community Safety Plan incorporates our Integrated Risk Management Plan (IRMP) actions which recognises the risks within the Authority boundaries that are identified in the Community Risk Profile and need to be addressed, and ensures that the available resources are targeted at these risks.
- Communication of objectives to staff and stakeholders takes place through the following means:
 - Distribution of the Strategic Community Safety Plan on the Authority's website and intranet;
 - Consultation with staff, public and stakeholders on IRMP proposals;
 - The issue of an Annual Report and Statement of Assurance setting out the Authority's priorities, how the Authority spent money on achieving these during the last financial year, and how successful the Authority has been;
 - Through the Authority's Investors in People processes;
 - Posters throughout the Authority's premises;
 - Listening events and staff presentations.

Arrangements are in place to review the Authority's vision and its implications for the Authority's governance arrangements:

- The Strategic Community Safety Plan, the Integrated Risk Management Plan and all priorities are regularly reviewed to provide a long-term focus for the Authority.
- Through reviews by external bodies the Authority constantly seeks ways of securing continuous improvement. The Authority has professional and objective relationships with these external bodies.
- There are comprehensive annual reviews of the local Code of Corporate Governance to ensure that it is up to date and effective.

Arrangements exist for measuring the quality of services for users, for ensuring they are delivered in accordance with the Authority's objectives and for ensuring that they represent the best use of resources:

- There are clear and effective performance management arrangements including personal development plans for all staff, which address financial responsibilities and include equality objectives.
- There is regular reporting of performance against key targets and priorities to the Authority's Strategic Management Team, the Governance Committee and the Policy and Performance Committee.

Annual Governance Statement (continued)

- Services are delivered by suitably qualified/trained/experienced staff and all posts have detailed job profiles/descriptions and person specifications.
- External auditors deliver an opinion annually on whether the Authority is providing value for money.

The roles and responsibilities of all Officers and staff are clearly defined and documented, with clear delegation arrangements and protocols for effective communication:

- Standing Orders and Financial Regulations are in place and these set out how the Authority operates and how decisions are made, including a clear Delegation Scheme.
- The Standing Orders and Delegation Scheme indicates responsibilities for functions and sets out how decisions are made.
- A system of scrutiny is in place whereby the Governance Committee provides independent scrutiny of the Authority's financial and non-financial performance to the extent that it affects the Authority's exposure to risk and weakens the control environment; and the Policy and Performance Committee scrutinises performance information in respect of the Authority's duty to secure best value and to consider policy initiatives in respect of emerging issues.

Codes of Conduct defining the standards of behaviour for Members and staff are in place, conform with appropriate ethical standards, and are communicated and embedded across the organisation:

- The following are in place:
 - Members' Codes of Conduct;
 - Employees' Code of Conduct;
 - Registers of Interests, Gifts and Hospitality;
 - Monitoring Officer Protocols.

Standing orders, standing financial instructions, a scheme of delegation and supporting procedure notes/manuals, which are reviewed and updated as appropriate, clearly define how decisions are taken and the processes and controls required to manage risks:

- The Head of Financial Resources at Sunderland City Council is the designated Finance Officer in accordance with Section 151 of the Local Government Act 1972 ensuring lawfulness and financial prudence of decision-making, and is responsible for the proper administration of the Authority's financial affairs.
- The Deputy Clerk is the Authority's Monitoring Officer who has maintained an up-to-date version of the Standing Orders and has endeavoured to ensure lawfulness and fairness of decision making.
- The Authority has in place up to date financial procedure rules and procurement rules which are subject to regular review.
- Written procedures are in place covering financial and administrative matters, as well as HR policies and procedures. These include:
 - Codes of Conduct (incorporating anti fraud and whistle blowing protocols);
 - Health and Safety Policy;
 - Compliments, Comments and Complaints Policy;
 - Corporate Risk Management Strategy;
 - Procurement Codes of Practice;
 - Partnerships procedure;

Annual Governance Statement (continued)

- Treasury Management Strategy based upon CIPFA's Treasury Management Codes;
- Functional budget management schemes.
- There are robust and well embedded risk management processes in place, including:
 - Risk Management Strategy and Policy Statement;
 - Corporate Risk Profile;
 - Integrated Risk Management Plan;
 - Nominated Risk Manager;
 - Corporate Risk Management Group;
 - Partnerships Risk Register;
 - Member Risk Champion;
- There are comprehensive budgeting systems in place and a robust system of budgetary control, including formal quarterly and annual financial reports, which indicate financial performance against forecasts.
- The Authority has achieved accreditation to ISO22301 and Business Continuity Plans are in place which are subject to ongoing review, development and testing.
- There are clearly defined capital expenditure guidelines and capital appraisal procedures in place.
- Appropriate project management disciplines are utilised.
- The Authority participates in the National Fraud Initiative and subsequent investigations.

The core functions of an audit committee, as identified in CIPFA's *Audit Committees – Practical Guidance for Local Authorities*, are undertaken by members.

The Authority has a Governance Committee which, as well as approving the Authority's Statement of Accounts, undertakes an assurance and advisory role to:

- consider the effectiveness of the Authority's corporate governance arrangements, risk management arrangements, the control environment and associated anti-fraud and anti-corruption arrangements and seek assurance that action is being taken on risk-related issues identified by auditors and inspectors;
- be satisfied that the Authority's assurance statements, including the Statement of Internal Control, properly reflect the risk environment and any actions required to improve it;
- receive and consider (but not direct) internal audit's strategy, plan and monitor performance;
- receive and consider the external audit plan;
- review a summary of internal audits, the main issues arising, and seek assurance that action has been taken where necessary;
- receive and consider the annual report of internal audit;
- consider the reports of external audit agencies, including the Annual Audit Letter;
- ensure that there are effective relationships between external and internal audit, inspection agencies and other relevant bodies, and that the value of the audit process is actively promoted;

Annual Governance Statement (continued)

- review the external auditor's opinions and reports to members, and monitor management action in response to the issues raised by external audit; and
- make recommendations or comments to the Authority as appropriate.

Arrangements exist to ensure compliance with relevant laws and regulations, internal policies and procedures, and that expenditure is lawful. All reports are considered for legal issues before submission to members:

- The Deputy Clerk is the Authority's designated Monitoring Officer and a protocol is in place with all Principal Officers, to safeguard the legality of all Authority activities.
- The Authority maintains an Internal Audit Service, provided by Sunderland City Council. An independent annual review of its effectiveness is undertaken which concluded that it operated in accordance with professional standards. Internal audit work is planned on the basis of risk.

Arrangements for whistle-blowing and for receiving and investigating complaints from the public are in place and are well publicised:

- The Authority is committed to establishing and maintaining effective reporting arrangements to ensure that, where an individual, whether an employee of the Authority, a Member, or any member of the public, has serious concerns regarding the conduct of any aspect of the Authority's business, they can do so through a variety of avenues, promptly and in a straight forward way.
- The framework in place to ensure the aims of this Policy are met are set out in the Whistle Blowing arrangements which are included in the Employees' Code of Conduct. Members of the public currently raise issues through the Compliments, Comments and Complaints procedure and there is also a whistle blowing policy and procedure for members of the public.
- Monitoring records held by the Deputy Clerk on behalf of Members, and the Chief Fire Officer on behalf of staff and members of the public reveal that the whistle blowing arrangements are being used, and that the Authority is responding appropriately. The whistle blowing arrangements have assisted with the maintenance of a strong regime of internal control.

Arrangements exist for identifying the development needs of members and Principal officers in relation to their strategic roles:

- The Authority has a Members Learning and Development Programme in place which sets out a clear commitment to Members to provide a range of learning and development opportunities which will improve their knowledge, skills and abilities in their individual or collective roles in meeting Authority strategic objectives. In addition Members have access to their nominating authority learning and development policies, plans and procedures.
- The Elected Member Learning and Development Programme aims:
 - To provide comprehensive Member development;
 - To ensure that all newly elected Members are properly inducted into the Authority;
 - To ensure that all emerging needs for both individuals and across the board are identified and addressed;
 - To ensure that resources available for Member development are effectively used.
- The Authority has a Human Resource Strategy to enable and support the organisation in managing the performance of all of its employees through effective policies, procedures and working practices and is key to ensuring that the organisation meets the needs of the community. This includes assessing ability against requirements of the role, annual performance review

Annual Governance Statement (continued)

- focusing on strengths and highlighting areas of weakness, job related training, and ongoing evaluation and includes the extent to which an employee understands and supports the values of the Authority.

Clear channels of communication have been established with all sections of the community and other stakeholders, ensuring accountability and encouraging open consultation:

- The Authority has a Consultation Strategy which aims to ensure that consultation activity is effectively co-ordinated across the Authority and with partner agencies, impacts on service delivery, and is delivered to a high standard.
- The strategy is complemented by the Community Engagement Strategy which outlines the Authority's approach to engaging with the community, in particular minority and vulnerable sectors of society.

Governance arrangements with respect to partnerships and other group working incorporate good practice as identified by the Audit Commission's report on the governance of partnerships, and are reflected in the Authority's overall governance arrangements:

- The Authority has published a Partnerships Procedure which includes a template for Partnership Agreements and a Partnership Toolkit. The procedure is designed to provide a corporate framework for all staff involved in considering new partnership working, and to assist Members and officers to review existing arrangements.
- A Register of Partnerships is maintained. The deliverables of all prospective and existing partnerships is closely measured using a standard framework.
- A review of all partnerships is presented to the Strategic Management Team on an annual basis.

REVIEW OF EFFECTIVENESS

The Authority has responsibility for conducting, at least annually, a review of the effectiveness of its governance framework including the system of internal control. The review of the effectiveness is informed by feedback from Members and the work of all senior managers within the authority who have responsibility for the development and maintenance of the governance environment, the Internal Audit Annual Report, and also by comments made by the external auditors and other review agencies and inspectorates.

The process that has been applied in maintaining and reviewing the effectiveness of the system of internal control includes the following:

- The role of the Authority:
 - Elected Members have participated in the annual review of the Authority's Corporate Governance arrangements;
 - The Chair of the Authority, the Chief Fire Officer and the Finance Officer have overseen the review and signed the Annual Governance Statement.
- The role of the Strategic Management Team:
 - The findings of the Annual Governance Review have been reported to the Strategic Management Team for their consideration and approval of the Annual Governance Statement.
- The role of the Governance Committee:

Annual Governance Statement (continued)

- The findings of the Annual Governance Review have been reported to the Governance Committee. Under their Terms of Reference the Governance Committee has satisfied
- themselves that the Authority's assurance statements, including the Annual Governance Statement, properly reflect the risk environment and any actions required to improve it.
- A system of scrutiny is in place whereby the Governance Committee provides independent scrutiny of the Authority's financial and non-financial performance to the extent that it affects the Authority's exposure to risk and weakens the control environment; and the Policy and Performance Committee scrutinises performance information in respect of the Authority's duty to secure best value and to consider policy initiatives in respect of emerging issues
- A Standards Committee is also in place in accordance with the Localism Act 2011. The role of this Committee is to:
 - promote and maintain high standards of conduct by the members of the Authority;
 - assist the members of the Authority to observe the Members' Code of Conduct;
 - advise the Authority on the adoption or revision of the Members' Code of Conduct; monitor the operation of the Members' Code of Conduct;
 - advise, train or arrange to train members of the Authority on matters relating to the Members' Code of Conduct;
 - grant dispensations to Members from requirements relating to interests set out in the Members' Code of Conduct so far as not delegated to the Monitoring Officer;
 - deal with written allegations that a member of the Authority (or former member) has failed, or may have failed, to comply with the Members' Code of Conduct;
 - adopt and amend procedures to be followed for investigations and local determination of complaints;
 - consider reports of the Monitoring Officer and of the Local Government Ombudsman where they concern the conduct of members of the Authority; and
 - support the Monitoring Officer in his/her role.

All Area Managers have participated in the annual governance review through carrying out self-assessments relating to their areas of responsibility and have provided Controls Assurance Statements relating to their area of responsibility, having considered the detailed self-assessments.

Internal audit planning processes include consultation with the Principal Officers, reviews of the Strategic Community Safety Plan, Integrated Risk Management Plan and the Corporate Risk Profile. Audit work is risk based and includes risks in relation to the achievement of service objectives, and Internal Audit Services carries out regular systematic auditing of key financial and non-financial systems. The external auditor, Mazars, has carried out an independent review of the effectiveness of Internal Audit by reference to the new standards for internal audit (UK Public Sector Internal Audit Standards, which apply across the whole of the public sector). This concluded that the service continues to comply with the relevant standards

The Authority is subject to external audit which was completed by the Audit Commission in 2011/2012; responsibility for this has since passed to Mazars, a private company appointed by the Audit Commission for this purpose. The Annual Audit Letter gives independent assurance of financial

Annual Governance Statement (continued)

control and Value for Money (including financial resilience and the overall efficiency and effectiveness of the Authority).

In the latest Annual Audit Letter Mazars issued an unqualified conclusion on both financial arrangements and Value for Money, and identified no significant weaknesses in the Authority's arrangements for internal control. Their report included comments that:

- The Authority managed its financial position well. Budget setting was robust and close monitoring ensured delivery of spending within revenue and capital budget limits.
- The Authority is financially resilient. The Medium Term Financial Strategy sets out how the Authority proposes to deal with the difficult economic climate and the cuts in funding. The Authority has considered the impact of the retention of business rates and localisation of council tax support, and is monitoring these areas closely.
- Careful financial management has enabled the Authority to build up a good level of earmarked reserves that are set aside for specific plans and projects. The latest Value for Money profiles produced by the Audit Commission show that the General Fund Balance was relatively low, and that earmarked reserves are the highest for all fire authorities, reflecting the Authority's managed plans for future spending.

It is considered that the Annual Audit Letter give reassurance that the Authority's overall governance and control arrangements are satisfactory. The outcome of the review of effectiveness was that no significant issues were identified.

Findings of external bodies/audits are collated, acted upon and monitored by the Strategic Management Team.

ASSURANCE STATEMENTS

The Strategic Management Team, the Authority and the Governance Committee have advised us of the findings of the review of the effectiveness of the governance framework, and an action plan has been agreed for the continuous improvement of the Authority's Corporate Governance and Internal Control Arrangements.

We propose over the coming year to take steps to implement the action plan to further enhance the Authority's governance arrangements. We are satisfied that these steps will address the need for improvements that were identified in the review of effectiveness and will monitor their implementation and operation as part of the next annual review.

Cllr Tom Wright
Chair of the Authority

Tom Capeling
Chief Fire Officer

Sonia Tognarelli
Finance Officer

Movement in Reserves Statement

This statement shows the movement in the year on the different reserves held by the Authority, analysed into 'usable reserves' (i.e. those that can be applied to fund expenditure or reduce local taxation) and other reserves. The Surplus or (Deficit) on the Provision of Services line shows the true economic cost of providing the Authority's services, more detail of which are shown in the Comprehensive Income and Expenditure Statement. These are different to the statutory amounts required to be charged to the General Fund Balance. The Net (Increase) / Decrease before Transfers to / (from) Earmarked Reserves line shows the statutory General Fund Balance before any discretionary transfers to or from earmarked reserves undertaken by the Authority.

	General Fund Balance Restated £'000	Earmarked GF Reserves £'000	Capital Receipts Reserve £'000	Total Usable Reserves Restated £'000	Unusable Reserves Restated £'000	Total Authority Reserves Restated £'000
Balance at 31 March 2012	(3,187)	(29,470)	(3,285)	(35,943)	635,980	600,037
<u>Movement in reserves during 2012/2013</u>						
(Surplus) or Deficit on provision of services	20,893	0	0	20,893	0	20,893
Other Comprehensive Income and Expenditure	0	0	0	0	82,310	82,310
Total Comprehensive Income and Expenditure	20,893	0	0	20,893	82,310	103,203
Adjustments between accounting basis & funding basis under regulations	(20,278)	0	0	(20,278)	20,278	0

Balance Sheet

The Balance Sheet shows the value at the Balance Sheet date of the assets and liabilities recognised by the Authority. The net assets of the Authority (assets less liabilities) are matched by reserves held by the Authority. Reserves are prepared in two categories. The first category of reserves are usable reserves, i.e. those reserves that the Authority may use to provide services, subject to the need to maintain a prudential level of reserves and any statutory limitations on their use (for example the Capital Receipts Reserve may only be used to fund capital expenditure or repay debt). The second category of reserves is those that the Authority is not able to use to provide services. This category of reserves holds unrealised gains and losses (for example the Revaluation Reserve), where amounts would only become available to provide services if the assets are sold; and reserves that hold timing differences shown in the Movement in Reserves Statement line 'Adjustments between accounting basis and funding basis under regulations'.

Cash Flow Statement

The Cash Flow Statement shows the changes in cash and cash equivalents of the Authority during the reporting period. The statement shows how the Authority generates and uses cash and cash equivalents by classifying cash flows as operating, investing and financing activities. The amount of net cash flows arising from operating activities is a key indicator of the extent to which the operations of the Authority are funded by way of taxation and grant income or from the recipients of services provided by the Authority. Investing activities represent the extent to which cash outflows have been made from resources which are intended to contribute towards the Authority's future service delivery. Cash flows arising from financing activities are useful in predicting claims on future cash flows by providers of capital (i.e. borrowing) to the Authority.

2012/2013		Notes	2013/2014

Notes to the Core Financial Statements

Note 1 – Accounting Policies

1.1 General Principles

The Statement of Accounts summarises the Authority's transactions for the 2013/2014 financial year and its position at the year-end of 31st March 2014. The Authority is required to prepare an annual Statement of Accounts by the Accounts and Audit Regulations 2011, and these Regulations require the Statement of Accounts to be prepared in accordance with proper accounting practices. These practices primarily comprise the Code of Practice on Local Authority Accounting in the United Kingdom 2013/2014 and the CIPFA Service Reporting Code of Practice 2013/2014 (SeRCOP), both based on International Financial Reporting Standards (IFRS). CIPFA guidance notes for practitioners have also been referred to and applied where appropriate, particularly in relation to the accounting treatment adopted for Government top up grant in the Firefighters' Pension Fund.

The accounting convention adopted in the Statement of Accounts is principally historical cost, modified by the revaluation of certain categories of non-current assets and financial instruments.

1.2 Financial Instruments

Financial Liabilities

Financial liabilities are recognised on the Balance Sheet when the Authority becomes a party to the contractual provisions of a financial instrument and are initially measured at fair value and are carried at their amortised cost. Annual charges to the Financing and Investment Income and Expenditure line in the Comprehensive Income and Expenditure Statement for interest payable are based on the carrying amount of the liability, multiplied by the effective rate of interest for the instrument. The effective interest rate is the rate that exactly discounts estimated future cash payments over the life of the instrument to the amount at which it was originally recognised.

For most of the borrowings that the Authority has, the amount presented in the Balance Sheet is the outstanding principal repayable (plus accrued interest); and interest charged to the Comprehensive Income and Expenditure Statement is the amount payable for the year according to the loan agreement.

Financial Assets

Financial assets are classified into two types:

- Loans and receivables – assets that have fixed or determinable payments but are not quoted in an active market; and
- Available-for-sale assets – assets that have a quoted market price and/or do not have fixed or determinable payments.

Loans and Receivables

Loans and receivables are recognised on the Balance Sheet when the Authority becomes a party to the contractual provisions of a financial instrument and are initially measured at fair value. They are subsequently measured at their amortised cost. Annual credits to the Financing and Investment Income and Expenditure line in the Comprehensive Income and Expenditure Statement for interest receivable are based on the carrying amount of the asset multiplied by the effective rate of interest for the instrument. For most of the loans that the Authority has made, this means that the amount presented in the Balance Sheet is the outstanding principal receivable (plus accrued interest) and interest credited to the Comprehensive Income and Expenditure Statement is the amount receivable for the year in the loan agreement.

Where assets are identified as impaired because of a likelihood arising from a past event that payments due under the contract will not be made, the asset is written down and a charge made to the relevant service (for receivables specific to that service) or the Financing and Investment Income and Expenditure line in the Comprehensive Income and Expenditure Statement. The impairment loss is

1.2 Financial Instruments (continued)

measured as the difference between the carrying amount and the present value of the revised future cash flows discounted at the asset's original effective interest rate.

Any gains and losses that arise on the derecognition of an asset are credited or debited to the Financing and Investment Income and Expenditure line in the Comprehensive Income and Expenditure Statement.

Available-for-Sale Assets

Available-for-sale assets are recognised on the Balance Sheet when the Authority becomes a party to the contractual provisions of a financial instrument and are initially measured and carried at fair value. Where the asset has fixed or determinable payments, annual credits to the Financing and Investment Income and Expenditure line in the Comprehensive Income and Expenditure Statement for interest receivable are based on the amortised cost of the asset multiplied by the effective rate of interest for the instrument. Where there are no fixed or determinable payments, income (e.g. dividends) is credited to the Comprehensive Income and Expenditure Statement when it becomes receivable by the Authority. Assets are maintained in the Balance Sheet at fair value. Values are based on the following principles:

- Instruments with quoted market prices – the market price;
- Other instruments with fixed and determinable payments – discounted cash flow analysis;
- Equity shares with no quoted market prices – independent appraisal of company valuations.

Changes in fair value are balanced by an entry in the Available-for-Sale Reserve and the gain/loss is recognised in the Surplus or Deficit on Revaluation of Available-for-Sale Financial Assets. The exception is where impairment losses have been incurred – these are debited to the Financing and Investment Income and Expenditure line in the Comprehensive Income and Expenditure Statement, along with any net gain or loss for the asset accumulated in the Available-for-Sale Reserve.

Where assets are identified as impaired because of a likelihood arising from a past event that payments due under the contract will not be made (fixed or determinable payments) or fair value falls below cost, the asset is written down and a charge made to the Financing and Investment Income and Expenditure line in the Comprehensive Income and Expenditure Statement. If the asset has fixed or determinable payments, the impairment loss is measured as the difference between the carrying amount and the present value of the revised future cash flows discounted at the asset's original effective interest rate. Otherwise, the impairment loss is measured as any shortfall of fair value against the acquisition cost of the instrument (net of any principal repayment and amortisation).

Any gains and losses that arise on the de-recognition of the asset are credited or debited to the Financing and Investment Income and Expenditure line in the Comprehensive Income and Expenditure Statement, along with any accumulated gains or losses previously recognised in the Available-for-Sale Reserve.

Where fair value cannot be measured reliably, the instrument is carried at cost (less any impairment losses).

Other Investments

Investments in companies and in marketable securities are shown in the balance sheet at cost. Provision for losses in value is made where appropriate in accordance with the Code of Practice on Local Authority Accounting. No such provisions have been considered necessary at this time.

1.3 Intangible Assets

Expenditure on non-monetary assets that do not have physical substance but are controlled by the Authority as a result of past events (e.g. software licences) is capitalised when it is expected that future economic benefits or service potential will flow from the intangible asset to the Authority.

1.4 Property, Plant and Equipment

Assets that have physical substance and are held for use in the production or supply of goods or services, for rental to others, or for administrative purposes and that are expected to be used during more than one financial year are classified as Property, Plant and Equipment.

Recognition

Expenditure on the acquisition, creation or enhancement of Property, Plant and Equipment is capitalised on an accruals basis, provided that it is probable that the future economic benefits or service potential associated with the item will flow to the Authority and the cost of the item can be measured reliably. Expenditure that maintains but does not add to an asset's potential to deliver future economic benefits or service potential (i.e. repairs and maintenance) is charged as an expense when it is incurred.

Measurement

Assets are initially measured at cost, comprising:

- The purchase price;
- Any costs attributable to bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by management; and
- The initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located.

The Authority does not capitalise borrowing costs incurred whilst assets are under construction.

The cost of assets acquired other than by purchase is deemed to be its fair value, unless the acquisition does not have commercial substance (i.e. it will not lead to a variation in the cash flows of the Authority). In the latter case, where an asset is acquired via an exchange, the cost of the acquisition is the carrying amount of the asset given up by the Authority.

Donated assets are measured initially at fair value. The difference between fair value and any consideration paid is credited to the Taxation and Non-Specific Grant Income line of the Comprehensive Income and Expenditure Statement, unless the donation has been made conditionally. Until conditions are satisfied, the gain is held in the Donated Assets Account. Where gains are credited to the Comprehensive Income and Expenditure Statement, they are reversed out of the General Fund Balance to the Capital Adjustment Account in the Movement in Reserves Statement.

Assets are then carried in the Balance Sheet using the following measurement bases:

- Infrastructure, community assets and assets under construction – depreciated historical cost;
- All other assets – fair value, determined as the amount that would be paid for the asset in its existing use (existing use value – EUV).

Where there is no market-based evidence of fair value because of the specialist nature of an asset, depreciated replacement cost (DRC) is used as an estimate of fair value.

Where non-property assets that have short useful lives or low values (or both), depreciated historical cost basis is used as a proxy for fair value.

Assets included in the Balance Sheet at fair value are revalued sufficiently regularly to ensure that their carrying amount is not materially different from their fair value at the year-end, but as a minimum every five years. To ensure that this takes place a rolling programme of valuations has been put in place by the Head of Land and Property. Assets are valued in accordance with the principles of the RICS (Royal Institution of Chartered Surveyors) Appraisals and Valuation Standards. The valuations are supervised by N.Wood, ARICS, of the Authority. Increases in valuations are matched by credits to the Revaluation Reserve to recognise unrealised gains. Exceptionally, gains might be credited to the Comprehensive Income and Expenditure Statement where they arise from the reversal of a loss previously charged to a service.

1.4 Property, Plant and Equipment (continued)

Where decreases in value are identified, they are accounted for by:

- Where there is a balance of revaluation gains for the asset in the Revaluation Reserve, the carrying amount of the asset is written down against that balance (up to the amount of the accumulated gains); and
- Where there is no balance in the Revaluation Reserve or an insufficient balance, the carrying amount of the asset is written down against the relevant service line(s) in the Comprehensive Income and Expenditure Statement.

The Revaluation Reserve contains revaluation gains recognised since 1 April 2007 only, the date of its formal implementation. Gains arising before that date have been consolidated into the Capital Adjustment Account.

De Minimis Levels

The Authority also operates a de-minimis level, under which expenditure on fixed assets is charged to revenue as it is incurred. The de-minimis level has been established at a value of £20,000 for the recording of capital assets in respect of properties. The de-minimis level for equipment remains at a value of £10,000. All vehicles are recorded as fixed assets irrespective of cost.

Impairment

Assets are assessed at each year-end as to whether there is any indication that an asset may be impaired. Where indications exist and any possible differences are estimated to be material, the recoverable amount of the asset is estimated and, where this is less than the carrying amount of the asset, an impairment loss is recognised for the shortfall.

Where impairment losses are identified, they are accounted for by:

- Where there is a balance of revaluation gains for the asset in the Revaluation Reserve, the carrying amount of the asset is written down against that balance (up to the amount of the accumulated gains); and
- Where there is no balance in the Revaluation Reserve or an insufficient balance, the carrying amount of the asset is written down against the relevant service line(s) in the Comprehensive Income and Expenditure Statement.

Where an impairment loss is reversed subsequently, the reversal is credited to the relevant service line(s) in the Comprehensive Income and Expenditure Statement, up to the amount of the original loss, adjusted for depreciation that would have been charged if the loss had not been recognised.

Depreciation

Depreciation is provided for on all Property, Plant and Equipment by the systematic allocation of their depreciable amounts over their useful lives. An exception is made for assets without a determinable finite useful life (i.e. freehold land and certain Community Assets) and assets that are not yet available for use (i.e. assets under construction).

Depreciation on all Property, Plant and Equipment has been calculated by taking the asset value at 31st March 2013 less any residual value, divided by life expectancy.

The life expectancy for each asset category falls within the following ranges:

Asset Category	Years
Buildings	15 - 60
Vehicles, plant and furniture	2 - 20

1.4 Property, Plant and Equipment (continued)

Where an item of Property, Plant and Equipment has major components whose cost is significant in relation to the total cost of the item, the components are depreciated separately. As no componentised assets have been revalued in 2013/2014 the depreciation method is unchanged from previous years.

A standard list of components that will be used by the Authority is:

- Building structure;
- Mechanical and electrical

Revaluation gains are also depreciated, with an amount equal to the difference between current value depreciation charged on assets and the depreciation that would have been chargeable based on their historical cost being transferred each year from the Revaluation Reserve to the Capital Adjustment Account.

Disposals & Non-current Assets Held for Sale

When it becomes probable that the carrying amount of an asset will be recovered principally through a sale transaction rather than through its continuing use, it is reclassified as an Asset Held for Sale. The asset is revalued immediately before reclassification and then carried at the lower of this amount and fair value less costs to sell. Where there is a subsequent decrease to fair value less costs to sell, the loss is posted to the Other Operating Expenditure line in the Comprehensive Income and Expenditure Statement. Gains in fair value are recognised only up to the amount of any previous losses recognised in the Surplus or Deficit on Provision of Services. Depreciation is not charged on Assets Held for Sale.

If assets no longer meet the criteria to be classified as Assets Held for Sale, they are reclassified back to non-current assets and valued at the lower of their carrying amount before they were classified as held for sale; adjusted for depreciation, amortisation or revaluations that would have been recognised had they not been classified as Held for Sale, and their recoverable amount at the date of the decision not to sell.

Assets that are to be abandoned or scrapped are not reclassified as Assets Held for Sale. When an asset is disposed of or decommissioned, the carrying amount of the asset in the Balance Sheet (whether Property, Plant and Equipment or Assets Held for Sale) is written off to the Other Operating Expenditure line in the Comprehensive Income and Expenditure Statement as part of the gain or loss on disposal. Receipts from disposals (if any) are credited to the same line in the Comprehensive

Income and Expenditure Statement also as part of the gain or loss on disposal (i.e. netted off against the carrying value of the asset at the time of disposal). Any revaluation gains accumulated for the asset in the Revaluation Reserve are transferred to the Capital Adjustment Account.

Amounts received for a disposal in excess of £10,000 are categorised as capital receipts. Receipts are appropriated to the Reserve from the General Fund Balance in the Movement in Reserves Statement.

The written-off value of disposals is not a charge against taxpayers, as the cost of fixed assets is fully provided for under separate arrangements for capital financing. Amounts are appropriated to the Capital Adjustment Account from the General Fund Balance in the Movement in Reserves Statement.

1.5 Charges to Revenue for Non-Current Assets

General Fund service revenue accounts, central support services and trading accounts are charged with the following amounts to record the real cost of holding fixed assets during the year:

- Depreciation attributable to the assets used by the relevant service;
- Revaluation and impairment losses on assets used by the service where there are no accumulated gains in the Revaluation Reserve against which they can be written off;

1.5 Charges to Revenue for Non-Current Assets (continued)

- Amortisation of intangible fixed assets attributable to the service.

The Authority is required to make an annual provision from revenue to contribute towards the reduction in its overall borrowing requirement (equal to at least 4% of the underlying amount measured by the adjusted Capital Financing Requirement).

Depreciation, revaluation and impairment losses and amortisations are therefore replaced by the contribution in the General Fund Balance (Minimum Revenue Provision), by way of an adjusting transaction with the Capital Adjustment Account in the Movement in Reserves Statement for the difference between the two.

1.6 Accruals of Income & Expenditure

Activity is accounted for in the year that it takes place, not simply when cash payments are made or received.

Revenue from the sale of goods is recognised when the Authority transfers the significant risks and rewards of ownership to the purchaser and it is probable that economic benefits or service potential associated with the transaction will flow to the Authority.

Revenue from the provision of services is recognised when the Authority can measure reliably the percentage of completion of the transaction and it is probable that economic benefits or service potential associated with the transaction will flow to the Authority.

Supplies are recorded as expenditure when they are consumed – where there is a gap between the date supplies are received and their consumption; they are carried as inventories on the Balance Sheet.

Expenses in relation to services received (including services provided by employees) are recorded as expenditure when the services are received rather than when payments are made.

Interest receivable on investments and payable on borrowings is accounted for respectively as income and expenditure on the basis of the effective interest rate for the relevant financial instrument rather than the cash flows fixed or determined by the contract.

Where revenue and expenditure have been recognised but cash has not been received or paid, a debtor or creditor for the relevant amount is recorded in the Balance Sheet. Where debts may not be settled, the balance of debtors is written down and a charge made to revenue for the income that might not be collected. A full year's charge is included in the accounts for those supplies and services used continuously and charged on a periodic basis (e.g. gas, electricity and water), but the period covered by the payments does not always coincide with the financial year.

1.7 Inventories

Inventories are included in the Balance Sheet at the lower of the cost and net realisable value. The cost of inventories at the year-end are valued at weighted average cost price.

1.8 Cost of Support Services

External support services are provided to the Authority by Sunderland City Council, based upon a scheme approved by the Home Office. Support service costs from Sunderland City Council are charged on an estimated time or actual time spent basis, with the exception of the Financial Resources and Personnel Departments, which are charged on the basis of a Service Level Agreement. External support service costs are allocated to those services that benefit from the supply or service in accordance with the costing principles of the CIPFA Service Reporting Code of Practice 2013/14 (SeRCOP).

Internal support services are also charged to those services that benefit from the supply or service in accordance with the costing principles of SeRCOP. The total absorption costing principle is used, and the full cost of overheads and support services are shared between users in proportion to the benefits

1.8 Cost of Support Services (continued)

received, with the exception of:

- Corporate and Democratic Core – costs relating to the Authority’s status as a multi-functional, democratic organisation;
- Non-Distributed Costs – the cost of discretionary benefits awarded to employees retiring early.

These two cost categories are defined in SeRCOP and accounted for as separate headings in the Comprehensive Income and Expenditure Account, as part of Net Cost of Services.

1.9 Provisions

Provisions are made where an event has taken place that gives the Authority an obligation that will probably require settlement by a transfer of economic benefits, but where the timing of the transfer is uncertain.

Provisions are charged to the Comprehensive Income and Expenditure Statement in the year that the Authority becomes aware of the probable obligation, based on the best estimate of the likely settlement. When payments are eventually made, they are charged to the provision set up in the Balance Sheet. Estimated settlements are reviewed at the end of each financial year. Where it becomes more likely than not that a transfer of economic benefits will not now be required (or a lower settlement than anticipated is made), the provision is reversed and credited back to the relevant service revenue account.

Note 20 on page 59 provides information on the provisions set up by the Authority.

1.10 Reserves

The Authority sets aside specific amounts as reserves for future policy purposes or to cover contingencies. Reserves are created by appropriating amounts out of the General Fund Balance in the Movement in Reserves Statement. When expenditure is to be financed from a reserve, it is charged to the revenue account in that year to score against the Provision of Services, in the Comprehensive Income and Expenditure Account. The reserve is then appropriated back to the General Fund Balance statement in Movement in Reserves Statement so that there is no net charge against council tax for the expenditure. Detail on the movement on earmarked reserves during 2013/2014 is provided in note 7 on page 51.

In addition, certain accounts and reserves are maintained to manage the accounting processes for non-current assets, financial instruments, retirement and employee benefits do not represent usable resources for the Authority, however, as they are accounting requirements not physical cash reserves. Note 22 on page 59 provides further detail on these reserves.

1.11 Internal Interest

Interest is credited to the General Fund from the Lead Authority’s Capital Advances and Borrowing Pool based on cash flow and fund balances. The amounts are calculated using 7-day money market rates in accordance with guidance contained within the Code of Practice on Local Authority Accounting.

1.12 Delegated Budgets

The delegated budget scheme allows the carry forward of any under-spending to the following financial year. For 2013/2014, an appropriation has been made into the Budget Carry Forward Reserve for this purpose, as detailed in note 7 on page 51.

1.13 Employee Benefits (including Pensions)

Benefits Payable during Employment

Short-term employee benefits are those due to be settled within 12 months of the year-end. They include such benefits as wages and salaries, paid annual leave and paid sick leave, bonuses and non-monetary benefits (e.g. cars) for current employees and are recognised as an expense for services in the year in which employees render service to the Authority. An accrual is made for the cost of holiday entitlements (or any form of leave, e.g. time off in lieu) earned by employees but not taken before the year-end which employees can carry forward into the next financial year. The accrual is made at the wage and salary rates applicable in the following accounting year, being the period in which the employee takes the benefit.

The accrual is charged to Surplus or Deficit on the Provision of Services, but then reversed out through the Movement in Reserves Statement so that holiday benefits are charged to revenue in the financial year in which the holiday absence occurs.

Termination Benefits

Termination benefits are amounts payable as a result of a decision by the Authority to terminate an officer's employment before the normal retirement date or an officer's decision to accept voluntary redundancy and are charged on an accruals basis to the Non Distributed Costs line in the Comprehensive Income and Expenditure Statement when the Authority is demonstrably committed to the termination of the employment of an officer or group of officers or making an offer to encourage voluntary redundancy.

Where termination benefits involve the enhancement of pensions, statutory provisions require the General Fund balance to be charged with the amount payable by the Authority to the pension fund or pensioner in the year, not the amount calculated according to the relevant accounting standards. In the Movement in Reserves Statement, appropriations are required to and from the Pensions Reserve to remove the notional debits and credits for pension enhancement termination benefits and replace them with debits for the cash paid to the pension fund and pensioners and any such amounts payable but unpaid at the year-end.

Post Employment Benefits

The pension costs that are charged to the Authority's accounts can be divided into two types of pension arrangements, both of which have different accounting treatments which are set out below for information:

Firefighters' Pension Scheme

The firefighters' pension scheme is an unfunded, Defined Benefit Scheme. Employer and employee contributions are paid into the pension fund, together with a contribution from the Authority for the cost of ill health early retirements. The fund is topped up by Government grant if the contributions are insufficient to meet the cost of pension payments, with any surplus being recouped by Government.

The pension fund is ring-fenced to ensure accounting clarity. As such, a Pensions Fund Account and Net Assets Statement are reported as supplementary financial statements within the Authority's Statement of Accounts.

Local Government Pension Scheme

All non-uniformed staff of the Authority have the right to join the Local Government Pension Scheme (LGPS), which South Tyneside Metropolitan Council administers on behalf of all of the Tyne and Wear local authorities and other admitted bodies. The scheme is classified as a Defined Benefit Scheme based on final pensionable pay and as such must comply with IAS19. This requires the Authority to disclose certain information concerning assets, liabilities, income and expenditure related to the LGPS for its employees.

The liabilities of the pension scheme attributable to the Authority are included in the Balance Sheet on an actuarial basis using the projected unit credit method.

1.13 Employee Benefits (including Pensions) (continued)

Liabilities are discounted to their value at current prices, using a discount rate based on the indicative rate of return on high quality corporate bonds.

The assets of the pension fund attributable to the Authority are included in the Balance Sheet at their fair value:

- Quoted Securities – current bid price;
- Unquoted Securities – professional estimate;
- Unitised Securities – current bid price;
- Property – market value.

The change in the net pension liability is analysed into the following components:

- Service cost comprising:
 - Current Service Costs – the increase in liabilities as a result of years of service earned this year – allocated in the Comprehensive Income and Expenditure Statement to the revenue accounts of services for which the employees worked;
 - Past Service Costs – the increase in liabilities arising from current year decisions whose effect relates to years of service earned in earlier years – debited to the Surplus or Deficit on the Provision of Services in the Comprehensive Income and Expenditure Statement as part of Non Distributed Costs;
 - Net Interest on the Net Defined benefit Liability (Asset), i.e. net interest expense for the council – the change during the year in the net defined benefit liability (asset) that arises from the passage of time – debited to the Financing and Investment Income and Expenditure Income line in the Comprehensive Income and Expenditure Statement. This is calculated by applying the discount rate used to measure the defined benefit obligation at the beginning of the period to the net defined benefit liability (asset) at the beginning of the period, taking in to account any changes in the net defined benefit liability (asset) during the period as a result of contribution and benefit payments.
- Re-measurements comprising:
 - Return on Plan Assets – excluding amounts included in net interest on the net defined benefit liability (asset) – charged to the Pension Reserve as Other Comprehensive Income and Expenditure;
 - Actuarial Gains and Losses – changes in the net pension liability that arise because events have not coincided with assumptions made at the last actuarial valuation or because the actuaries have updated their assumptions – debited or credited to the Pension Reserve.
- Contributions paid to the Pension Fund – cash paid as employer's contributions to the pension fund in settlement of liabilities; not accounted for as an expense.

In relation to retirement benefits, statutory provisions require the General Fund balance to be charged with the amount payable by the Authority to the pension fund in the year, not the amount calculated according to the relevant accounting standards. In the Movement in Reserves Statement this means that there are appropriations to and from the Pensions Reserve to remove the notional debits and credits for retirement benefits and replace them with the debits for the cash paid to the pension fund and any amount payable to the fund but un-paid at the year end.

The negative balance that arises on the Pensions Reserve thereby measures the beneficial impact to the General Fund of being required to account for retirement benefits on the basis of cash flows rather than as benefits are earned by employees.

Discretionary Benefits

The Authority also has restricted powers to make discretionary awards of retirement benefits in the event of early retirements. Any liabilities estimated to arise as a result of an award to any member of staff are accrued in the year of the decision to make the award and accounted for using the same policies as are applied to the Local Government Pension Scheme.

1.14 Government Grants and Contributions

Whether paid on account, by instalments or in arrears, government grants and third party contributions and donations are recognised as due to the Authority when there is reasonable assurance that:

- The Authority will comply with the conditions attached to the payments; and
- The grants or contributions will be received.

Amounts recognised as due to the Authority are not credited to the Comprehensive Income and Expenditure Statement until conditions attached to the grant or contribution have been satisfied. Conditions are stipulations that specify that the future economic benefits or service potential embodied in the asset acquired using the grant or contribution are required to be consumed by the recipient as specified, or future economic benefits or service potential must be returned to the transferor.

Monies advanced as grants and contributions for which conditions have not been satisfied are carried in the Balance Sheet as creditors. When conditions are satisfied, the grant or contribution is credited to the relevant service line (attributable revenue grants and contributions) or Taxation and Non-Specific Grant Income (non-ringfenced revenue grants and all capital grants) in the Comprehensive Income and Expenditure Statement.

Where capital grants are credited to the Comprehensive Income and Expenditure Statement, they are reversed out of the General Fund Balance in the Movement in Reserves Statement. Where the grant has yet to be used to finance capital expenditure, it is posted to the Capital Grants Unapplied reserve. Where it has been applied, it is posted to the Capital Adjustment Account. Amounts in the Capital Grants Unapplied reserve are transferred to the Capital Adjustment Account once they have been applied to fund capital expenditure.

An analysis of Government Grants and Contributions is provided in Note 31 on page 69.

1.15 Long Term Borrowing

The Lead Authority administers all of the Authority's borrowing through its Consolidated Advances and Borrowing Pool (CABP) and, as such, the Authority does not undertake borrowing in its own name. The amount of borrowing undertaken by the Lead Authority on the Authority's behalf has been recognised within the Long Term Borrowing liabilities within the Statement of Accounts for 2013/2014.

1.16 External Interest

All interest payable on external borrowings and receivable on investments is accounted for on the basis of the effective interest rate for the relevant financial instrument rather than the cash flows fixed or determined by the contract.

1.17 Other Investments

Investments in companies and in marketable securities are shown in the Authority's Balance Sheet at cost. Provision for losses are made, where appropriate, in accordance with the Code of Practice on Local Authority Accounting. No such provisions have been considered necessary at this time.

Investments are all made via the Lead Authority's Consolidated Advances and Borrowing Pool.

1.18 Private Finance Initiative (PFI) and Similar Contracts

PFI contracts are agreements to receive services where the responsibility for making available the fixed

1.18 Private Finance Initiative (PFI) and Similar Contracts (continued)

assets needed to provide the services passes to the PFI contractor. The relevant note and information relating to the Authority's PFI scheme is detailed in Note 35 on page 72.

Recognising assets and liabilities

Property used in a PFI and similar contract shall be recognised as an asset or assets of the Fire Authority. A related liability shall also be recognised at the same time. The asset shall be recognised in accordance with the Code of Practice on Local Authority Accounting; this will be when the asset is made available for use unless the Fire Authority bears an element of the construction risk, which will not be the case where standard PFI contract terms are used. Where the Authority bears the construction risk, it shall recognise an asset under construction prior to the asset being made available for use where it is probable that the expected future benefits attributable to the asset will flow to the Authority. In accordance with the Code of Practice on Local Authority Accounting, separate assets shall be recognised in respect of land and buildings where appropriate. The related liability shall initially be measured at the value of the related asset, and subsequently shall be calculated using the same actuarial method used for finance leases under the Code of Practice on Local Authority Accounting.

Prepayments

PFI and similar contracts may be structured to require payments to be made (either as part of a unitary payment or a lump sum contribution) before the related property is recognised as an asset on the Balance Sheet. Such payments shall be recognised as prepayments. At the point that the infrastructure is recognised as an asset, the related liability shall also be recognised. The prepayments shall be applied to reduce the outstanding liability.

Depreciation, impairment and revaluation

Once recognised on the Balance Sheet, property under a PFI and similar contract is depreciated, impaired and re-valued in the same way as for any other fixed asset.

MRP (England and Wales)

Assets acquired under a PFI and similar contract that are recognised on the Authority's Balance Sheet are subject to MRP in the same way as assets acquired using other forms of borrowing. The amounts of MRP to be charged to the General Fund for the year shall be in accordance with the appropriate regulations and statutory guidance. Such amounts shall be transferred from the Capital Adjustment Account and reported in the Movement in Reserves Statement.

Capital financing requirement

Where PFI contracts or similar arrangements come 'on-Balance Sheet' as a result of the Code of Practice changes, the Capital Financing Requirement will be adjusted to reflect this and the authorised limits and operational boundaries will be set accordingly.

1.19 Leases

Leases are classified as finance leases where the terms of the lease transfer substantially all the risks and rewards incidental to ownership of the property, plant or equipment from the lessor to the lessee. All other leases are classified as operating leases.

Where a lease covers both land and buildings, the land and buildings elements are considered separately for classification. Arrangements that do not have the legal status of a lease but convey a right to use an asset in return for payment are accounted for under this policy where fulfilment of the arrangement is dependent on the use of specific assets.

(a) The Authority as Lessee

Finance Leases

Property, plant and equipment held under finance leases is recognised on the Balance Sheet at the commencement of the lease at its fair value measured at the lease's inception (or the present value of the minimum lease payments, if lower). The asset recognised is matched by a liability for the obligation to pay the lessor. Initial direct costs of the Authority are added to the carrying amount of the asset.

1.19 Leases (continued)

Premiums paid on entry into a lease are applied to writing down the lease liability. Contingent rents are charged as expenses in the periods in which they are incurred.

Lease payments are apportioned between:

- A charge for the acquisition of the interest in the property, plant or equipment – applied to write down the lease liability; and
- A finance charge (debited to the Financing and Investment Income and Expenditure line in the Comprehensive Income and Expenditure Statement).

Property, Plant and Equipment recognised under finance leases is accounted for using the policies applied generally to such assets, subject to depreciation being charged over the lease term if this is shorter than the asset's estimated useful life (where ownership of the asset does not transfer to the Authority at the end of the lease period).

The Authority is not required to raise council tax to cover depreciation or revaluation and impairment losses arising on leased assets. Instead, a prudent annual contribution is made from revenue funds towards the deemed capital investment in accordance with statutory requirements. Depreciation and revaluation and impairment losses are therefore substituted by a revenue contribution in the General Fund Balance, by way of an adjusting transaction with the Capital Adjustment Account in the Movement in Reserves Statement for the difference between the two.

Operating Leases

Rentals paid under operating leases are charged to the Comprehensive Income and Expenditure Statement as an expense of the services benefiting from use of the leased property, plant or equipment. Charges are made on a straight-line basis over the life of the lease; even if this does not match the pattern of payments (e.g. there is a rent-free period at the commencement of the lease).

b) The Authority as Lessor

Finance Leases

Where the Authority grants a finance lease over a property or an item of plant or equipment, the relevant asset is written out of the Balance Sheet as a disposal. At the commencement of the lease, the carrying amount of the asset in the Balance Sheet (whether Property, Plant and Equipment or Assets Held for Sale) is written off to the Other Operating Expenditure line in the Comprehensive Income and Expenditure Statement as part of the gain or loss on disposal. A gain, representing the Authority's net investment in the lease, is credited to the same line in the Comprehensive Income and Expenditure Statement also as part of the gain or loss on disposal (i.e. netted off against the carrying value of the asset at the time of disposal), matched by a lease (long-term debtor) asset in the Balance Sheet.

Lease rentals receivable are apportioned between:

- A charge for the acquisition of the interest in the property – applied to write down the lease debtor (together with any premiums received); and
- Finance income (credited to the Financing and Investment Income and Expenditure line in the Comprehensive Income and Expenditure Statement).

The gain credited to the Comprehensive Income and Expenditure Statement on disposal is not permitted by statute to increase the General Fund Balance and is required to be treated as a capital receipt. Where a premium has been received, this is posted out of the General Fund Balance to the Capital Receipts Reserve in the Movement in Reserves Statement. Where the amount due in relation to the lease asset is to be settled by the payment of rentals in future financial years, this is posted out of the General Fund Balance to the Deferred Capital Receipts Reserve in the Movement in Reserves Statement. When the future rentals are received, the element for the capital receipt for the disposal of the asset is used to write down the lease debtor. At this point, the deferred capital receipts are transferred to the Capital Receipts Reserve.

1.19 Leases (continued)

The written-off value of disposals is not a charge against council tax, as the cost of fixed assets is fully provided for under separate arrangements for capital financing. Amounts are therefore appropriated to the Capital Adjustment Account from the General Fund Balance in the Movement in Reserves Statement.

Operating Leases

Where the Authority grants an operating lease over a property or an item of plant or equipment, the asset is retained in the Balance Sheet. Rental income is credited to the Other Operating Expenditure line in the Comprehensive Income and Expenditure Statement. Credits are made on a straight-line basis over the life of the lease, even if this does not match the pattern of payments (e.g. there is a premium paid at the commencement of the lease). Initial direct costs incurred in negotiating and arranging the lease are added to the carrying amount of the relevant asset and charged as an expense over the lease term on the same basis as rental income.

1.20 VAT

VAT payable is included as an expense only to the extent that it is not recoverable from HM Revenue & Customs. VAT receivable is excluded from income.

1.21 Interests in Companies and Other Entities

If the Authority has material interests in companies and other entities that have the nature of subsidiaries, associates and jointly controlled entities this will require group accounts to be prepared. Where there is an interest which is not material any such interests in companies and other entities are then recorded as financial assets at cost, less any provision for losses. Tyne and Wear does not have to prepare group accounts as the interest in North East Fire Control Company Limited is not considered material and especially so now that the Company was dissolved on 28th May 2013.

1.22 Prior Period Adjustments, Changes in Accounting Policies and Estimates and Errors

Prior period adjustments may arise as a result of a change in accounting policies or to correct a material error. Changes in accounting estimates are accounted for prospectively, i.e. in the current and future years affected by the change and do not give rise to a prior period adjustment.

Changes in accounting policies are only made when required by proper accounting practices or the change provides more reliable or relevant information about the effect of transactions, other events and conditions on the Authority's financial position or financial performance.

Where a change is made, it is applied retrospectively (unless stated otherwise) by adjusting opening balances and comparative amounts for the prior period as if the new policy had always been applied.

Material errors discovered in prior period figures are corrected retrospectively by amending opening balances and comparative amounts for the prior period.

The followings estimations have been made:

Pensions Liabilities

Pensions liabilities included in the Balance Sheet have been assessed on an actuarial basis using the roll-forward method. The Pension Fund liabilities have been assessed by Aon Hewitt Limited (LGPS) and by the Government Actuary's Department (firefighters' pensions), both independent actuaries, who also estimate the Pension position as at 31st March 2014 based on the latest full valuation of the scheme as at 31st March 2013 and their assessments of future movements in the return on pension assets and future pension liabilities (see Note 38 on page 73).

Apportionment of costs for Community Safety

As required by CIPFA Service Reporting Code of Practice 2013/14 (SeRCOP), the Authority must

1.22 Prior Period Adjustments, Changes in Accounting Policies and Estimates and Errors (continued)

present its expenditure and income at the mandatory reporting levels, including Community Safety and Fire Fighting and Rescue Operations. The majority of transactions are classified directly as relating to either of these categories, however, the Authority also makes a transfer for the cost of Community Safety related activities undertaken by Fire Fighting staff. This transfer is based on actual activity figures, recorded by the Authority through the year.

The approach to quantifying the transfer uses actual activity figures for home fire risk assessments and fire inspections to estimate the time taken to undertake these community safety activities. This is then applied to an average rate of pay to estimate the total cost to be transferred from Firefighting to Community Safety in the Authority's Comprehensive Income and Expenditure Account.

Utilities

Utilities costs contained within the Cost of Services Expenditure Analysis are calculated using estimation. The final period charge for the financial year is estimated based upon the previous year's consumption for the same period multiplied by the latest price information. An adjustment is made for any significant variances when the actual utilities bills are received.

Creditor Provisions

In a small number of cases, estimation is used to calculate payments outstanding to creditors where the Authority has yet to be billed for services delivered prior to the year-end. The impact of any such estimations is not material to the Authority's Accounts.

1.23 Events after the Balance Sheet Date

Events after the Balance Sheet date are those events, both favourable and unfavourable, that occur between the end of the reporting period and the date when the Statement of Accounts is authorised for issue. Two types of events can be identified:

- Those that provide evidence of conditions that existed at the end of the reporting period – the Statement of Accounts is adjusted to reflect such events;
- Those that are indicative of conditions that arose after the reporting period – the Statement of Accounts is not adjusted to reflect such events, but where a category of events would have a material effect, disclosure is made in the notes of the nature of the events and their estimated financial effect.

Events taking place after the date of authorisation for issue are not reflected in the Statement of Accounts.

1.24 Exceptional Items

When items of income and expense are material, their nature and amount is disclosed separately, either on the face of the Comprehensive Income and Expenditure Statement or in the notes to the accounts, depending on how significant the items are to an understanding of the Authority's financial performance.

1.25 Cash and Cash Equivalents

Cash is represented by cash in hand and deposits with financial institutions repayable without penalty on notice of not more than 24 hours. Cash equivalents are investments that mature in no more than three months or less from the date of acquisition and that are readily convertible to known amounts of cash with insignificant risk of change in value.

The Authority's cash and cash equivalents is held within the Lead Authority's bank accounts and investments.

1.26 Contingent Liabilities

A contingent liability arises where an event has taken place that gives the Authority a possible obligation whose existence will only be confirmed by the occurrence or otherwise of uncertain future events not wholly within the control of the Authority. Contingent liabilities also arise in circumstances where a provision would otherwise be made but either it is not probable that an outflow of resources will be required or the amount of the obligation cannot be measured reliably.

Contingent liabilities are not recognised in the Balance Sheet but disclosed in a note to the accounts.

1.27 Contingent Assets

A contingent asset arises where an event has taken place that gives the Authority a possible asset whose existence will only be confirmed by the occurrence or otherwise of uncertain future events not wholly within the control of the Authority.

Contingent assets are not recognised in the Balance Sheet but disclosed in a note to the accounts where it is probable that there will be an inflow of economic benefits or service potential.

1.28 Revenue Expenditure Funded from Capital under Statute

Expenditure incurred during the year that may be capitalised under statutory provisions but that does not result in the creation of a non-current asset has been charged as expenditure to the relevant service in the Comprehensive Income and Expenditure Statement in the year. Where the Authority has determined to meet the cost of this expenditure from existing capital resources or by borrowing, a transfer in the Movement in Reserves Statement from the General Fund Balance to the Capital Adjustment Account then reverses out the amounts charged so that there is no impact on the level of precept.

1.29 Foreign Currency Translation

Where the Authority has entered into a transaction denominated in a foreign currency, the transaction is converted into sterling at the exchange rate applicable on the date the transaction was effective. Where amounts in foreign currency are outstanding at the year end, they are converted at the spot exchange rate at 31 March. Resulting gains and losses are recognised in the Financing and Investment Income and Expenditure line in the Comprehensive Income and Expenditure Statement.

1.30 Heritage Assets

The Authority has no heritage assets it needs to report upon.

1.31 Officer Remuneration

Remuneration refers to all amounts paid to or receivable by an employee of the Authority and includes sums by way of expenses allowances, and the estimated money value of any other benefits received by an employee otherwise than in cash.

The Authority discloses the number of employees whose annual remuneration is over £50,000, broken down in to bandings of £5,000. In addition, remuneration is disclosed by category for senior employees defined as:

- All those whose salary is £150,000 or more;
- All those whose salary is £50,000 or more who meet at least one of the following criteria:
 - statutory chief officers (per section 2(6) of the Local Government and Housing Act 1989 as amended) of the Authority, or
 - non-statutory chief officers (per section 2(7) of the 1989 Act as amended).

Note 2 – Accounting standards that have been issued but have not yet been adopted

The Code for 2014/2015 has introduced several changes in accounting policies which are required from 1st April 2014.

IAS 32 Financial Instruments: Presentations

IAS 32 outlines the accounting requirements for the presentation of financial instruments, particularly as to the classification of such instruments into financial assets, financial liabilities and equity instruments. Changes to the Code in 2014/2015 specify when a financial asset and liability can be offset and the net amount presented in the Balance Sheet. The Statement of Accounts discloses assets and liabilities separately and no change is anticipated in the 2014/2015 accounts.

Annual Improvements to IFRSs 2009 – 2011 Cycle

The International Accounting Standard Board's annual improvements project provides a streamlined process for enhancing the quality of standards, by clarifying guidance and wording and making minor corrections. The main change which could affect the Authority is the clarification of the disclosure requirements in respect of comparative information. The Statement of Accounts fully discloses comparative information for the preceding period therefore no impact is anticipated in the 2014/2015 accounts.

A number of the Code changes address the accounting for consolidation, involvements in joint arrangements and disclosure of involvement in other entities. These include:

IFRS 10 Consolidated Financial Statements

IFRS 10 outlines the requirements for the preparation and presentation of consolidated financial statements, requiring entities to consolidate entities it controls.

IFRS 11 Joint Arrangements

IFRS 11 outlines the accounting by entities that jointly control an arrangement. Joint control involves the contractually agreed sharing of control and arrangements subject to joint control are classified as either a joint venture or a joint operation.

IFRS 12 Disclosure of Interests in Other Entities

IFRS 12 requires disclosures about an entity's interests in subsidiaries, joint arrangements, associates and unconsolidated 'structured entities'.

IAS 27 Separate Financial Statements

IAS 27 outlines the accounting and disclosure requirements for 'separate financial statements'.

IAS 28 Investments in Associates and Joint Ventures

IAS 28 outlines the accounting for investments in associates. An associate is an entity over which an investor has significant influence.

IFRS 10, 11, 12, 27 and 28 will not impact on the Authority's accounts.

Note 3 – Critical Judgements in applying Accounting Policies

In applying the accounting policies set out in Note 1, the Authority has had to make certain judgements about complex transactions or those involving uncertainty about future events. The critical judgements made in the Statement of Accounts are:

- There is a high degree of uncertainty about future levels of funding for local government. However, the Authority has determined that this uncertainty is not yet sufficient to provide an indication that the assets of the Authority might be impaired as a result of a need to close facilities and reduce levels of service provision.
- Retirement benefit obligations – the Authority recognise and disclose its retirement benefit obligation in accordance with the measurement and presentational requirement of IAS19 ‘Employee Benefits’. The calculations include a number of judgements and estimations in respect of the expected rate of return on assets, the discount rate, inflation assumptions, the rate of increase in salaries and life expectancy amongst others. Changes in these assumptions can have a significant effect on the value of the retirement benefit obligation. The key assumptions made are set out in Note 38.
- Provisions – provisions are measured at the Finance Officers’ best estimate of the expenditure required to settle the obligation at the Balance Sheet date, and are discounted to present value where the effect is material. Impairment of property, plant and equipment and computer software – property, plant and equipment and computer software are reviewed for impairment if events or changes in circumstances indicate that the carrying amount may not be recoverable. When a review for impairment is conducted, the recoverable amount is determined based on value in use calculations prepared on the basis of management’s assumptions and estimates. See Note 11 on page 54 for further details.
- Depreciation of property, plant and equipment and amortisation of computer software – depreciation and amortisation is provided so as to write down the assets to their residual values over their estimated useful lives as set out above. The selection of these residual values and estimated lives requires the exercise of management judgement. See Note 11 on page 54 for further details.

Note 4 – Assumptions made about the Future and Major Sources of Estimation Uncertainty

The Statement of Accounts contains estimated figures that are based on assumptions made by the Authority about the future or that are otherwise uncertain. Estimates are made taking into account historical experience, current trends and other relevant factors. However, because balances cannot be determined with certainty, actual results could be materially different from the assumptions and estimates.

The items in the Authority’s Balance Sheet at 31 March 2014, for which there is a significant risk of material adjustment in the forthcoming financial year, are as follows:

Item	Uncertainties	Effect if Actual Results Differ from Assumptions
Property, Plant and Equipment	Assets are depreciated over their useful lives that are dependent on assumptions about the level of repairs and maintenance that will be incurred in relation to individual assets. The current economic climate makes it uncertain that the Authority will be able to sustain its current spending on repairs and maintenance, bringing into doubt the useful lives assigned to assets.	If the useful life of assets is reduced, depreciation increases and the carrying amount of the assets falls. It is estimated that the annual depreciation charge for buildings would increase by £20,668 for every year that useful lives had to be reduced.
Provisions	The Authority has made an insurance provision of £247,308.	An increase over the forthcoming year of 10% in either the total number of claims or the estimated average settlement would each have the effect of adding £24,730

Item	Uncertainties	Effect if Actual Results Differ from Assumptions
Pensions Liability	Estimation of the net liability to pay pensions depends on a number of complex judgements relating to the discount rate used, the rate at which salaries are projected to increase, changes in retirement ages, mortality rates and expected returns on pension fund assets. A firm of consulting actuaries is engaged to provide the Authority with expert advice about the assumptions to be applied.	to the provision needed. The effects on the net LGPS pension liability changes in individual assumptions can be measured. For instance, a 0.1% increase in the discount rate assumption would result in a decrease in the pension liability of £1.05m. However, the assumptions interact in complex ways and expert advice is required to ensure facts are accurate and reasonable.

Note 5 – Events After the Balance Sheet Date

Adjusting Post Balance Sheet Events

There are no Adjusting Post Balance Sheet Events

Non Adjusting Post Balance Sheet Events

There are no Non Adjusting Post Balance Sheet Events

Note 6 – Adjustments between Accounting Basis and Funding Basis under Regulations

This note reconciles the adjustments that are made by the Authority to the Comprehensive Income and Expenditure Statement in the financial year in accordance with proper accounting practice, to the resources that are specified by statutory provisions as being available to the Authority to meet future capital and revenue expenditure.

Notes	2013/2014		2012/2013	
	General Fund Balance	Movement In Unusable Reserves	Movement In Unusable Reserves Restated	
	£000	£000	£000	
Adjustments involving the Capital Adjustment Account:				
<u>Reversal of items debited or credited to the Comprehensive Income and Expenditure Statement</u>				
Charges for Depreciation and Impairment of non current assets	11 & 14	(6,186)	6,186	2,634
Capital Grants and Contributions	33	1,780	(1,780)	(726)
Movement in the Donated Assets Account	31	113	(113)	(151)
Amounts of non current assets written off on disposal/sale as part of gain/loss on disposal	11	0	0	0
<u>Insertion of items not debited or credited to the Comprehensive Income and Expenditure Statement:</u>				
Statutory provision for the financing of capital investment	33	1,453	(1,453)	(1,499)
Capital expenditure charged against General Fund balances	33	559	(559)	(3,519)
Adjustments involving the Pensions Reserve:				
Reversal of items relating to retirement benefits debited or credited to the Comprehensive Income and Expenditure Statement	22 & 38	(47,630)	47,630	43,990
Employer's pensions contributions and direct payments to pensioners payable in the year	22 & 38	23,780	(23,780)	(21,440)
Adjustments involving the Collection Fund Adjustment Account:				
Amount by which council tax and non-domestic rating income credited to the Comprehensive Income and Expenditure Statement is different to council tax and non-domestic rating income calculated for the year in accordance with statutory requirements	22	(134)	134	(377)
Adjustments involving the Accumulating Compensated Absences Adjustment Account:				
Amount of which officer remuneration charged to the Comprehensive Income and Expenditure Statement on an accruals basis is different from remuneration chargeable in the year in accordance with statutory requirements	22	(23)	23	(32)
		(26,287)	26,287	18,878

Note 7 – Movements in Earmarked Reserves

The following table reports the movement on the Authority's Earmarked Reserves during the year.

	Balance at 1st April 2012 £000	Transfers out 2012/2013 £000	Transfers in 2012/2013 £000	Balance at 31st March 2013 £000	Transfers out 2013/2014 £000	Transfers in 2013/2014 £000	Balance at 31st March 2014 £000
General Fund Balance	3,187	0	684	3,872	0	0	3,872
Capital Reserves							
Usable Capital Receipts	3,286	0	0	3,286	0	0	3,286
Total Capital Reserves	3,286	0	0	3,286	0	0	3,286
Revenue Reserves

Total Reserves	35,943	(4,148)	3,534	35,328	(9,134)	10,430	36,624

Note 7 - Movements in Earmarked Reserves (continued)

The table, above, shows the movement on the Authority's earmarked reserves for the year ended 31st March 2014. Detail on the purpose of each reserve is provided below:

- **PFI Smoothing Reserve** - Government Grants received for PFI schemes, in excess of current levels of expenditure, are carried forward as an earmarked reserve to fund future contract expenditure. This has the effect of smoothing the impact of PFI schemes on the Authority's revenue budget over the lifetime of the scheme.
- **Insurance Reserve** - this reserve is held to protect the Authority from:
 - any unexpected volatility;
 - potential future changes in legislation that could be retrospective;
 - any unknown exposures that may arise in the future;
 - the Municipal Mutual Insurance Scheme of Arrangement reserve that was established in 1993/1994 to cover a possible shortfall in the eventual settlement of claims against MMI.

The reserve also includes accumulated insurance premium discounts received, arising from the Authority's positive approach to risk management. These sums are retained to offset the cost of further risk management initiatives in future years.

- **Early Retirement Reserve** - this reserve was established in order to cover future compensatory added years payments, associated with an early retirement during 2002/2003. This has ensured that the costs are covered in the year of retirement and will not lead to on-going revenue implications. The reserve will be reduced each year as payments are made to the Tyne and Wear Pension Fund.
- **Development Reserve** - this reserve was created to fund medium term and long term capital and revenue developments.
- **Contingency Planning Reserve** - this reserve was established following a review of the potential liabilities arising from a major industrial dispute. Having considered the principles, criteria and framework upon which the Authority's Business Continuity Strategy should be based, the reserve is intended to ensure that the communities of Tyne and Wear are protected in the event of a major industrial dispute.
- **Budget Carry Forward Reserve** - this reserve is used to fund the slippage of specific items of revenue expenditure.
- **New Dimensions Reserve** - this reserve is used to provide for any adverse effect of planned changes in funding from specific to general grant and to provide resources to meet future specific costs in relation to delivering an appropriate response.
- **Community Safety Reserve** - this reserve was established to deliver community safety initiatives in future years. This follows the success of similar schemes carried out during previous years.
- **Civil Emergency Reserve** - this reserve was established to enable the Authority to respond to a major catastrophic event, either within Tyne and Wear, or another region, where there would likely be additional cost pressures placed upon the Authority (over and above the reimbursement level that might be expected from other Fire Authorities or through the Bellwin scheme). This reserve enables the Authority to deliver the necessary level of support without impacting on its revenue budget.
- **Regional Control Centre Reserve** - this reserve was established to provide a means of offsetting any costs associated with the Regional Control Centre (RCC) project. With the cancellation of the national project suitable provision will need to be made for a replacement command and control system.

Note 7 - Movements in Earmarked Reserves (continued)

- **Carbon Management Plan Reserve** - this reserve was established as the Authority is currently working in partnership with the Carbon Trust and other Fire and Rescue Authorities in the region to develop a Carbon Reduction Plan. The implementation of this plan will necessitate some investment in order to make future savings both in carbon emissions and energy bills.
- **Equality and Diversity Reserve** - this reserve was established to support the Authority's commitment to achieve higher equality and diversity recruitment targets and to foster the aim to be seen as an 'employer of choice'.
- **Organisational Change Reserve** - this reserve was created to cover the expected costs following a review of the organisational changes required for the Authority to operate more effectively.
- **Medium Term Planning Reserve** - this reserve was established to plan for the impact of government reductions in funding, due to localisation of the business rates retention system and the impact on precepting authorities of localisation of the council tax benefit scheme.
- **Command and Control Reserve** – this reserve was established in this financial year for the Command and Control Grant received from DCLG. This has been used during the year to finance replacement of the Command and Control System.

Note 8 – Other Operating Expenditure

Depreciation

The following useful lives and depreciation rates have been used in the calculation of depreciation:

- Land and Buildings - 20 – 60 years
- Vehicles, Plant and Equipment - 5 – 15 years

Note 11 – Property, Plant and Equipment (continued)

Capital Commitments

At 31 March 2014, the Authority has entered into a number of contracts for the construction or enhancement of Property, Plant and Equipment in 2014/2015 budgeted to cost £5.552m (as at 31 March 2013 £4.505m). The major commitments are:

- Estates Development Strategy Works (£3.400m)
- ICT software and hardware (£0.435m)
- Estates (£0.379m)
- Operational Equipment (£0.068m)
- Carbon Management Plan (£0.280m)
- Vehicle Replacement Programme (£0.990m)

Revaluations

The Authority carries out a rolling programme that ensures that all Property, Plant and Equipment required to be measured at fair value is revalued at least every five years. All valuations are carried out by the Lead Authority and valuations of Land and Buildings were carried out in accordance with the methodologies and bases for estimation set out in the professional standards of the Royal Institute of Chartered Surveyors.

	Land and Buildings £'000	Vehicles, Plant, Furniture and Equipment £'000	Total £'000
Carried at historical cost	534	15,665	16,199
Valued at fair value as at:			
31 March 2014	(5,411)	0	(5,411)
31 March 2013	2,298	0	2,298
31 March 2012	(2,842)	0	(2,842)
31 March 2011	8,610	0	8,610
31 March 2010	0	0	0
31 March 2009	53,750	0	53,750
Total Cost or Valuation	56,939	15,665	72,604

Note 12 – Heritage Assets

The Authority has no Heritage Assets as at 31st March 2014 to report.

Note 13 – Investment Properties

The Authority has no contractual obligations to purchase, construct or develop investment property or repairs, maintenance or enhancement.

Note 14 – Intangible Assets

The Authority accounts for its software as intangible assets, to the extent that the software is not an integral part of a particular IT system and accounted for as part of the hardware item of Property, Plant and Equipment. The integral assets include both purchased licences and software.

All software is given a finite useful life, based on assumptions of the period that the software is expected to be of use to the Authority. The useful life for all software is deemed to be 5 years. The carrying amount of intangible assets is amortised on a straight line basis. The amortisation of £38,676 was charged to revenue in 2013/2014.

Note 14 – Intangible Assets (continued)

The movement on Intangible Asset balances during the year is as follows:

	2013/2014 Total £'000	2012/2013 Total £'000
Balance at start of year:	74	113
Additions during the year	0	0
Amortisation for the period	(39)	(39)
Net carrying amount at the year end	35	74
Comprising of		
Gross carrying amounts	235	235
Accumulated amortisation	(200)	(161)
Net carrying amount at the year end	35	74

Note 15 – Financial Instruments

Categories of Financial Instruments

	Long Term		Current

Total Borrowings	(14,344)	(14,941)	(598)	(623)
Other Long Term Liabilities				
PFI and finance lease liabilities	(22,630)	(23,519)	(752)	(710)
Total Other Long Term Liabilities	(22,630)	(23,519)	(752)	(710)
Creditors				
Financial liabilities carried at contract amount	0	0	(10,023)	(11,930)
Total Creditors	0	0	(10,023)	(11,930)

*The analysis of maturity of borrowing and disclosures on credit risk, market risk and liquidity risk are not required to be included in the accounts. All borrowing and investments for the Authority is carried out by the lead authority, Sunderland City Council who bears all risks. These issues are considered in more detail in the Authority's Treasury Management Strategy.

Note 16 – Inventories

	Consumable Stores		Maintenance Materials		Total	
	2013/2014	2012/2013	2013/2014	2012/2013	2013/2014	2012/2013

(6,531)	(6,173)	Total	(4,666)

Note 20 – Long-Term Provisions

	Insurance Provision £'000
Balance at 1 April 2012	(211)
Additional provisions made in 2012/2013	(248)
Amounts used in 2012/2013	129
Balance at 31 March 2013	(330)
Additional provisions made in 2013/2014	(129)
Amounts used in 2013/2014	212
Balance at 31 March 2014	(247)

All provisions are insurance related.

Note 21 – Usable Reserves

Movements in the Authority's usable reserves are detailed in Note 7 – Movements in Earmarked Reserves on pages 51 to 53.

Note 22 – Unusable Reserves

2011/2012	2012/2013		2013/2014
£'000	£'000		£'000
1,815	1,815	Revaluation Reserve	2,289
20,042	23,304	Capital Adjustment Account	21,023
(657,450)	(763,710)	Pensions Reserve	(740,790)
(187)	190	Collection Fund Adjustment Account	56
(200)	(168)	Accumulated Absence Account	(191)
(635,980)	(738,568)	Total Unusable Reserve	(717,613)

Revaluation Reserve

The Revaluation Reserve contains the gains made by the Authority arising from increases in the value of its Property, Plant and Equipment. The balance is reduced when assets with accumulated gains are;

- revalued downwards or impaired and the gains are lost;
- used in the provision of services and the gains are consumed through depreciation, or;
- disposed of and the gains are realised.

The Reserve contains only revaluation gains accumulated since 1st April 2007, the date that the Reserve was created. Accumulated gains arising before that date are consolidated into the balance on the Capital Adjustment Account.

2012/2013 £'000		Movement during the year	2013/2014 £'000
1,815	Balance at 1 April		1,815
0	Upward Revaluations of Assets	474	
0	Downward Revaluation of Assets and Impairment Losses not charged to the Surplus/Deficit on the Provision of Services	0	
1,815	Balance at 31 March	474	2,289

Capital Adjustment Account

The Capital Adjustment Account absorbs the timing differences arising from the different arrangements for accounting for the consumption of non-current assets and for financing the acquisition, construction or enhancement of those assets under statutory provisions. The Account is debited with the cost of acquisition, construction or enhancement as depreciation, impairment losses and amortisations are charged to the Comprehensive Income and Expenditure Statement (with reconciling postings from the Revaluation Reserve to convert fair value figures to a historical cost basis). The Account is credited with the amounts set aside by the Authority as finance for the costs of acquisition, construction and enhancement.

The Account also contains revaluation gains accumulated on Property, Plant and Equipment before 1 April 2007, the date that the Revaluation Reserve was created to hold such gains.

Note 6 on page 50 provides details of the source of all the transactions posted to the Account, apart from those involving the Revaluation Reserve.

2012/2013 £'000		2013/2014 £'000
20,042	Balance at 1 April	23,304
	Reversal of items relating to capital expenditure debited or credited to the Comprehensive Income and Expenditure Statement:	
(2,596)	Charges for depreciation and impairment of non-current assets	(6,147)
0	Revaluation losses on Property, Plant and Equipment	0
(39)	Amortisation of intangible assets	(39)
0	Amount of non current assets written off on disposal or sale as part of the gain / loss on disposal to the Comprehensive Income and Expenditure Statement	0
17,408		17,118
	Capital financing applied in the year;	
726	Capital grants and contributions credited to the Comprehensive Income and Expenditure Statement that have been applied to capital financing	1,780
1,499	Statutory provision for the financing of capital investment charged against the General Fund balance	1,453
3,519	Capital expenditure charged against the General Fund balance	559
151	Movement in the Donated Asset Account credited to the Income and Expenditure Statement	113
23,304	Balance at 31 March	21,023

Note 22 – Unusable Reserves (continued)

Pensions Reserve

The Pensions Reserve absorbs the timing differences arising from the different arrangements for accounting for post employment benefits and for funding benefits in accordance with statutory provisions. The Authority accounts for post employment benefits in the Comprehensive Income and Expenditure Statement as the benefits are earned by employees accruing years of service, updating the liabilities recognised to reflect inflation, changing assumptions and investment returns on any resources set aside to meet the costs. However, statutory arrangements require benefits earned to be financed as the Authority makes employer's contributions to pension funds or eventually pay any pensions for which it is directly responsible. The debit balance on the Pensions Reserve therefore shows a substantial shortfall in the benefits earned by past and current employees and the resources the Authority has set aside to meet them. The statutory arrangements will ensure that funding will have been set aside by the time the benefits come to be paid.

2012/2013 Restated £'000		2013/2014 £'000
(657,450)	Balance at 1 April	(763,710)
(83,710)	Re-measurement of the net defined benefit liability / (asset)	46,770
(43,990)	Reversal of items relating to retirement benefits debited or credited to the Surplus or Deficit on the Provision of Services in the Comprehensive Income and Expenditure Statement	(47,630)
21,440	Employers pensions contributions and direct payments to pensioners payable in the year	23,780
(763,710)	Balance at 31 March	(740,790)

Collection Fund Adjustment Account

The Collection Fund Adjustment Account manages the differences arising from the recognition of council tax and non-domestic rating income in the Comprehensive Income and Expenditure Statement as it falls due from council tax payers and business rate payers compared with the statutory arrangements for paying across amounts to the General Fund from the Collection Fund.

2012/2013 £'000		2013/2014 £'000
187	Balance at 1 April	(190)
(377)	Amount by which council tax and non-domestic rating income credited to the Comprehensive Income and Expenditure Statement is different from the council tax and non-domestic rating income calculated for the year in accordance with statutory requirements	134
(190)	Balance at 31 March	(56)

Note 22 – Unusable Reserves (continued)

Accumulated Absences Account

The Accumulated Absences Account absorbs the differences that would otherwise arise on the General Fund Balance from accruing for compensated absences earned but not taken in the year e.g. annual leave entitlement carried forward at 31 March. Statutory arrangements require that the impact on the General Fund Balance is neutralised by transfers to or from the Account.

2012/2013 £'000		2013/2014 £'000
(200)	Balance at 1 April	(168)
200	Settlement or cancellation of accrual made at the end of the preceding year	168
(168)	Amounts accrued at the end of the current year	(191)
(168)	Balance at 31 March	(191)

Note 23 – Cash Flow Statement – Operating Activities

The cash flows from operating activities include the following items:

2012/2013 £'000		2013/2014 £'000
(262)	Interest received	(188)
2,845	Interest paid	2,704
2,583	Net Cash Flows from Operating Activities	2,516

Note 24 – Cash Flow Statement – Investing Activities

2012/2013 £'000		2013/2014 £'000
4,246	Purchase of property, plant and equipment, investment property and intangible assets	2,339
4,246	Net cash flows from Investing Activities	2,339

Note 25 – Cash Flow Statement – Financing Activities

2012/2013 £'000		2013/2014 £'000
(726)	Other receipts and financing activities	(1,780)
649	Repayments of short and long term borrowing	623
861	Other payments and financing activities	847
783	Net cash flows from Financing Activities	(310)

Note 26 – Amounts Reported for Resource Allocation Decisions

The analysis of income and expenditure by service on the face of the Comprehensive Income and Expenditure Statement is that specified by CIPFA Service Reporting Code of Practice 2013/14 (SeRCOP). However, decisions about resource allocation are taken by the Authority on the basis of budget reports analysed across departments. These reports are prepared on a different basis from the accounting policies used in the financial statements, in particular;

- no charges are made in relation to capital expenditure (whereas depreciation, revaluation and impairment losses in excess of the balance on the Revaluation Reserve and amortisations are charged to services in the Comprehensive Income and Expenditure Statement);
- the cost of retirement benefits is based on cash flows (payment of employer's pensions contributions) rather than current service cost of benefits accrued in the year.

The income and expenditure of the Authority's principal departments recorded in the budget reports for the year is as follows:

Departmental Income and Expenditure 2013/2014

	Community Safety £'000	Fire Fighting and Rescue Operations £'000	Corporate and Democratic Core £'000	Non Distributed Costs £'000	Exceptional Items £'000	Total £'000
Fees and Charges	46	148	0	0	0	194
Government grants	0	1,112	0	0	0	1,112
Other Grants, reimbursements and contributions	293	831	0	0	0	1,124
Total Income	339	2,091	0	0	0	2,430
Employee expenses	4,166	22,725	7	281	0	27,179
Other Service expenses	607	3,782	199	0	3,711	8,299
Support services	1,832	8,128	34	0	0	9,994
Total Expenditure	6,605	34,635	240	281	3,711	45,472
Net Expenditure	6,266	32,544	240	281	3,711	43,042

Note 26 – Amounts Reported for Resource Allocation Decisions (continued)

Departmental Income and Expenditure 2012/2013

	Community Safety £'000	Fire Fighting and Rescue Operations £'000	Corporate and Democratic core £'000	Non Distributed Costs £'000	Total £'000
Fees and Charges	59	117	0	0	176
Government Grants	0	1,328	0	0	1,328

Reconciliation of Departmental Income and Expenditure to Cost of Services in the Comprehensive Income and Expenditure Account

This reconciliation shows how the figures in the analysis of portfolio income and expenditure relate to a subjective analysis of the Surplus or Deficit on the provision of services included in the Comprehensive Income and Expenditure Account.

2012/2013 £'000		2013/2014 £'000
41,581	Net expenditure in the portfolio analysis.	43,042
2	Net expenditure of services and support services not included in the analysis.	2
0	Amounts in the Comprehensive Income and Expenditure Account not reported to management in the analysis.	0
0	Amounts included in the analysis not included in the Comprehensive Income and Expenditure Statement.	0
41,583	Cost of Service in the Comprehensive Income and Expenditure Analysis	43,044

Reconciliation to Subjective Analysis

This reconciliation shows how the figures in the analysis of portfolio income and expenditure relate to a subjective analysis of the surplus or deficit on the provision of services included in the Comprehensive Income and Expenditure Statement.

Note 26 – Amounts Reported for Resource Allocation Decisions (continued)

2013/2014

	Portfolio Analysis £'000	Services and Support Services not in Analysis £'000	Cost of Services £'000	Corporate Amounts £'000	Total £'000

Note 27 – Trading Operations

The Authority is required to publish the financial results of services it operates on a trading account basis. The Cleaning Trading Account continues to be maintained on a trading basis and is included in CIPFA Service Reporting Code of Practice 2013/14 (SeRCOP). In 2013/2014, the Cleaning DSO recorded a trading surplus of £38,668 (£31,459 excluding adjustments for IAS19 costs) (£37,136 in 2012/2013, £35,406 excluding adjustments for IAS19 adjustments), which has been added to surpluses accumulated by the DSO in earlier years.

	2013/2014 £'000	2012/2013 £'000
Income		
Charges to other accounts of the Authority	206	206
Expenditure		
Labour	148	150
Materials	14	14
Overheads	5	5
Total Expenditure	167	169
Surplus / (Deficit) for the year (including IAS19)	39	37
Appropriation Account		
	2013/2014 £'000	2012/2013 £'000
Balance at start of year	151	114
Surplus / (deficit) for the year	39	37
Appropriated to reserves	(39)	0
Balance as at end of year	151	151

Note 28 – Members Allowances

The amount paid to Authority members during the year was:

	2013/2014 £'000	2012/2013 £'000
Total Member's Allowances Paid	65	68

Note 29 – Officers’ Remuneration

The number of employees, whose remuneration, excluding employer’s pension contributions, was £50,000 or more in bands of £5,000:

Remuneration Band	2013/2014	2012/2013
	Number of Employees	Number of Employees Restated
£50,000-£54,999	3	12
£55,000-£59,999	13	12
£60,000-£64,999	8	4
£65,000-£69,999	3	1
£70,000-£74,999	1	3
£100,000-£104,999	1	0
£105,000-£109,999	1	1
£130,000-£134,999	0	1
£135,000-£139,999	1	0
£140,000-£144,999	0	1
£165,000-£169,999	1	1
	32	36

The tables below disclose the specific remuneration information in relation to ‘Senior’ officers. The senior officers are those who are involved in influencing and making strategic decisions and developing policies for the organisation. For Tyne and Wear Fire and Rescue Authority, this is the Chief Fire Officer, the Deputy Chief Fire Officer and the Assistant Chief Fire Officers.

In accordance with the regulations, officers whose salary is £50,000 or more per year, but less than £150,000 are listed individually by way of job title. Officers whose salary is £150,000 or more per year are also identified by name. The disclosure is made for 2013/2014 and 2012/2013 in the following categories:

- salaries, fees and allowances;
- bonuses;
- expenses allowance;
- compensation for loss of employment;
- benefits in kind;
- employees pension contributions.

Note 29 – Officers’ Remuneration (continued)

Post Holder Information	Salary (Including Fees and Allowances)	Benefits in Kind	Total Remuneration excluding Pension Contributions 2013/2014	Employer’s Pension Contributions	Total Remuneration including Pension Contributions 2013/2014
	£	£	£	£	£
2013/2014

Assistant Chief Fire Officer - Strategy and Performance	91,910	3,973	95,883	12,132	108,015

Note 30 – External Audit Costs

Tyne and Wear Fire Authority has incurred the following costs in relation to the audit of the Statement of Accounts and for non-audit services provided by the Authority's external auditors.

	2013/2014 £'000	2012/2013 £'000
Fees payable to the Audit Commission with regard to external audit services carried out by the appointed auditor	51	37
Fees payable in respect of other services provided by the appointed auditor	1	1
Rebate received relating to audit services in previous year	6	0
	58	38

Note 31 – Grant Income

The Authority credited the following grants, contributions and donations to the Comprehensive Income and Expenditure Statement in 2013/2014:

	2013/2014 £'000	2012/2013 £'000
Credited to Taxation and Non Specific Grant Income		
Revenue Support Grant	20,413	603
National Non Domestic Rates	4,016	31,091
Top Up Grant	9,606	0
Council Tax Income	19,055	24,252
Council Tax Freeze Grant	240	241
	53,330	56,187
Credited to Services		
PFI Grant	3,358	3,358
Command and Control Grant	0	142
New Dimensions	993	991
Firelink	155	130
New Burdens	0	27
DCLG Return of Capitalisation Grant	108	0
Small Business Rates Relief Grant	89	0
	4,703	4,648

The Authority has received a number of grants, contributions and donations that have yet to be recognised as income as they have conditions attached to them that may require the monies or property to be returned to the giver. The balances at the year-end are as follows:

	2013/2014 £'000	2012/2013 £'000
Capital Grants Receipts in Advance		
Fire Capital Grant	5,357	4,357
Command and Control Grant	0	1,400
	5,357	5,757
Donated Assets Account		
New Dimensions Equipment	729	843
	729	843

Note 32 – Related Parties

The 'Code of Practice on Local Authority Accounting in the United Kingdom 2013/2014' requires the disclosure of any material transactions with related parties to ensure that stakeholders are aware when these transactions take place and the amount and implications of such transactions.

Central Government

Central Government has effective control over the general operations of the Authority – it is responsible for providing the statutory framework, within which the Authority operates, provides the majority of its funding in the form of grants and prescribes the terms of many of the transactions that the Authority has with other parties (e.g. council tax bills, housing benefits). Grants received from government departments are set out in the Note 31 on page 70 on reporting for resource allocation decisions.

Authority Members: Disclosures in respect of members' interests are required to be reported. After consultation with Members there are no disclosures to report.

Chief Officers: Disclosures in respect of Chief Officers' interests are also required to be reported. After consultation with Chief Officers there are no disclosures to report.

Other Relevant Information: Details of the Authority's transactions with Sunderland City Council for provision of support services are shown in the appropriate sections of the Income and Expenditure Account as disclosed in Accounting Policy 1.8 on page 37. The cost of Support services received by the Authority total £588,278 (£591,138 in 2012/2013).

Note 33 – Capital Expenditure and Capital Financing

The total amount of capital expenditure in the year is shown in the table below (including the value of assets acquired under finance leases and PFI contracts), together with the resources that have been used to finance it. Where capital expenditure is to be financed in future years by charges to revenue as assets are used by the Authority, the expenditure results in an increase in the Capital Financing Requirement (CFR), a measure of the capital expenditure incurred historically by the Authority that has yet to be financed.

Note 33 – Capital Expenditure and Capital Financing (continued)

	2013/2014 £'000	2012/2013 £'000
Opening Capital Financing Requirement	16,637	18,135
Capital Investment:		
Property, Plant and Equipment	2,339	4,246
Intangible Assets	0	0
Sources of Finance		
Government grants and other contributions	(1,780)	(726)
Sums set aside from		
Direct Revenue Contributions	(559)	(3,519)
MRP	(1,453)	(1,499)
Closing Capital Financing Requirement	15,184	16,637
Explanation of movements in year:		
Assets acquired under PFI contracts	0	0
Minimum Revenue Provision	(1,453)	(1,499)
Increase / (Decrease) in Capital Financial Requirement	(1,453)	(1,499)

Note 34 – Leases

Authority as Lessee

Finance Leases

The Authority has acquired a number of buildings and vehicles under finance leases.

	2013/2014 £'000	2012/2013 £'000
Other Land and Buildings	642	650
Vehicle, Plant, Furniture and Equipment	306	399
	948	1,049

The Authority is committed to making minimum payments under these leases comprising settlement of the long-term liability for the interest in the property acquired by the Authority and finance costs that will be payable by the Authority in future years while the liability remains outstanding. The minimum lease payments are made up of the following amounts:

Note 34 – Leases (continued)

	2013/2014	2012/2013
	£'000	£'000
Finance Lease Liabilities (NPV of future lease payments):		
Current	19	19
Non - Current	67	82
Finance costs payable in future years	1,160	1,257
Minimum lease payments	1,246	1,358

The minimum lease payments will be payable over the following periods:

	Minimum Lease Payments		Finance Lease Liabilities	
	2013/2014	2012/2013	2013/2014	2012/2013
	£'000	£'000	£'000	£'000
Not later than one year	112	112	19	19
Later than one year and not later than five years	342	435	59	66
Later than five years	792	811	8	16
	1,246	1,358	86	101

Operating Leases

The Authority has acquired a number of vehicles by entering into operating leases.

The future minimum lease payments due under non-cancellable leases in future years are:

	2013/2014	2012/2013
	£'000	£'000
Not later than one year	11	21
Later than one year and not later than five years	13	24
Later than five years	0	0
Minimum lease payments	24	45

Note 35 – Private Finance Initiatives and Similar Contracts

In March 2003, the Authority entered into a PFI contract to provide 6 new Fire Stations, a Service Headquarters and a new Technical Services Centre. The contract expires in May 2029.

In June 2009, the Authority entered into a collaborative PFI contract with Northumberland FRA and Durham and Darlington FRA to provide a new Community Fire Station at Tynemouth. The North East Fire and Rescue Authority (NEFRA) contract expires in May 2035.

The estimated contract payments for the PFI and NEFRA contracts are analysed over the life of the contract, as shown in the table below.

Note 35 – Private Finance Initiatives and Similar Contracts (continued)

	2013/2014	2014/2015	2018/2019	2023/2024	2028/2029	2033/2034	
		2017/2018	2022/2023	2027/2028	2032/2033	2036/2037	Total
	£'000	£'000	£'000	£'000	£'000	£'000	£'000

Total Expenditure	1,309	5,783	11,930	13,603	(151)	(61)	32,413

Note 36 – Impairment Losses

During 2013/2014, the Authority had no impairment loss (£0 in 2012/2013).

Note 37 – Termination Benefits and Exit Packages

There were 3 voluntary early retirements in 2013/2014. These resulted in total strain on fund liabilities of £38,355 (£343,283 in 2012/2013).

Note 38 – Defined Benefit Pension Schemes

As part of the terms and conditions of employment of its officers, the Authority makes contributions towards the cost of post employment benefits. Although these benefits will not actually be payable until employees retire, the Authority has a commitment to make the payments for those benefits and to disclose them at the time that employees earn their future entitlement.

The Authority participates in two post employment schemes:

- The firefighters' pension scheme for uniformed employees is an unfunded scheme, meaning that there are no investment assets built up to meet the pensions liabilities. The cost of pension payments is met from employer and employee contributions, with the balance being funded by the government through a top-up grant. The employers' contributions to the firefighters' pension fund account were 21.3% in respect of the 1992 Scheme and 11.0% in respect of the 2006 Scheme.
- The Local Government Pension Scheme for non-uniformed employees, administered by South Tyneside Council is a funded defined benefit salary scheme, meaning that the Authority and employees pay contributions into a fund, calculated at a level intended to balance the pensions liabilities with investment assets.

Transactions Relating to Post-employment Benefits

The Authority recognises the cost of retirement benefits in the reported cost of services when they are earned by employees, rather than when the benefits are eventually paid as pensions. However, the charge required to be made against council tax is based on the cash payable in the year, so the real cost of post employment / retirement benefits is reversed out of the General Fund via the Movement in Reserves Statement. The following transactions have been made in the Comprehensive Income and Expenditure Statement, including Past Service Costs which are treated as Non Distributed Costs, and are removed from the General Fund Balance via the Movement in Reserves Statement during the year:

Note 38 – Defined Benefit Pension Schemes (continued)

	Local Government Pension Scheme		Firefighters' Pension Scheme		Total	
	2013/2014 £'000	2012/2013 £'000	2013/2014 £'000	2012/2013 £'000	2013/2014 £'000	2012/2013 £'000

Contributions from employee in to the scheme	400	420
Benefits paid	(1,240)	(1,330)
Closing balance at 31 March	36,070	34,050

The firefighters' pension scheme has no assets to cover its liabilities.

Note 38 – Defined Benefit Pension Schemes (continued)

Reconciliation of Present Value of the Scheme Liabilities (Defined Benefit Obligation)

	Local Government Pension Scheme		Firefighters' Pension Scheme		Total	
	2013/2014	2012/2013	2013/2014	2012/2013	2013/2014	2012/2013
	£'000	£'000	£'000	£'000	£'000	£'000
Opening Balance at 1 April	57,630	51,080	740,130	635,910	797,760	686,990
Current Service Cost	1,580	1,440	13,190	10,990	14,770	12,430
Interest Cost	2,570	2,410	31,640	30,950	34,210	33,360
Contributions by scheme participants	400	420	2,970	2,780	3,370	3,200
Re-measurement (gains) and losses:						
<i>Local Government Scheme</i>						
Actuarial gains/losses arising from changes in demographic assumptions	(860)	0	0	0	(860)	0
Actuarial gains/losses arising from changes in financial assumptions	(4,280)	3,350	0	0	(4,280)	3,350
Other	(2,930)	(60)	0	0	(2,930)	(60)
<i>Firefighters' Scheme</i>						
Experience gains and losses arising on pension liabilities	0	0	(19,200)	(19,040)	(19,200)	(19,040)
Changes in assumptions underlying the present value of the pension liabilities	0	0	(19,820)	100,950	(19,820)	100,950
Past service cost	200	320	0	0	200	320
Benefits paid	(1,240)	(1,330)	(25,120)	(22,410)	(26,360)	(23,740)
Closing balance at 31 March	53,070	57,630	723,790	740,130	776,860	797,760

The liabilities show the underlying commitments that the Authority has in the long run to pay post employment (retirement) benefits. The net liability of £776.860m has a substantial impact on the negative net worth of £680.989m recorded on the balance sheet of the Authority. However, statutory arrangements for funding the deficit mean that the financial position of the Authority remains healthy:

- The deficit on the local government scheme will be made good by increased contributions over the remaining working life of employees (i.e. before payments fall due), as assessed by the scheme actuary.
- Finance is only required to be raised to cover discretionary benefits when the pensions are actually paid.

The total contributions expected to be made to the Local Government Pension Scheme by the Authority in the year to 31 March 2015 is £1.6m.

Local Government Pension Scheme Assets

The firefighters' pension scheme has no assets to cover its liabilities. The approximate split of assets for the local government pension scheme is shown below.

	Asset split at 31 March 2014			Asset split at 31 March 2013
	Quoted	Unquoted	Total	
	%	%	%	%
Equities	58.1	8.7	66.8	68.0
Government Bonds	3.5	0.0	3.5	7.0
Corporate Bonds	11.5	0.0	11.5	11.0
Property	0.0	8.5	8.5	9.0
Cash	2.9	0.0	2.9	1.6
Other Assets	5.0	1.8	6.8	3.4
Total	81.0	19.0	100.0	100.0

Basis for Estimating Assets and liabilities

The liabilities have been assessed on an actuarial basis using the projected unit credit method, an estimate of the pensions that will be payable in future years dependant on assumptions about mortality rates, salary levels, etc. The local government pension scheme has been assessed by Aon Hewitt Limited, an independent firm of actuaries and the firefighters' pension scheme liabilities have been assessed by the Government Actuary's Department. Both estimates for the Authority fund are based on the latest full valuation of the scheme as at 1 April 2013.

The principal assumptions used by the actuary are:

	Local Government Pension Scheme		Firefighters' Pension Scheme	
	2013/2014	2012/2013	2013/2014	2012/2013
Mortality assumptions:				
Longevity at 65 for current pensioners:				
Men	23 years	21.7 years	23.5 years	23.5 years
Women	24.6 years	23.9 years	25.5 years	25.4 years
Longevity at 65 for future pensioners (aged 45):				
Men	25 years	23.5 years	26.6 years	26.7 years
Women	26.9 years	25.8 years	28.6 years	28.4 years
RPI	3.40%	3.70%	3.65%	3.65%
CPI	2.40%	2.80%	2.50%	2.50%
Rate of increase in salaries	3.90%	4.70%	4.50%	4.75%
Rate of increase in pensions	2.40%	2.80%	2.50%	2.50%
Rate for discounting scheme liabilities	4.30%	4.50%	4.40%	4.30%
Commutation – Pre 1 st April 1998	50.00%	50.00%	N/A	N/A
Commutation – Post 31 st March 2008	75.00%	75.00%	N/A	N/A

The estimation of the defined benefit obligations is sensitive to the actuarial assumptions set out in the table above. The sensitivity analyses below have been determined based on reasonably possible changes to the assumptions occurring at the end of the reporting period and assumes for each change that the assumption analysed changes while all the other assumptions remain constant. The assumptions in longevity, for example, assume that life expectancy increases or decreases for men and women. In practice, this is unlikely to occur, and changes in some of the assumptions may be interrelated. The estimations in the sensitivity analysis have followed the accounting policies for the scheme, i.e. on an actuarial basis using the projected unit credit method. The methods and types of assumptions used in preparing the sensitivity analysis below did not change from those used in the previous period.

Note 38 – Defined Benefit Pension Schemes (continued)

	Impact on the Defined Benefit Obligation			
	Local Government Pension Scheme		Firefighters' Pension Scheme	
	Increase in Assumption £'000	Decrease in Assumption £'000	Increase in Assumption £'000	Decrease in Assumption £'000
Longevity (increase or decrease in 1 year)	1,390	1,480		
Rate of increase in salaries (increase or decrease by 0.1%)	1,440	1,440		
Rate of increase in pensions (increase or decrease by 0.1%)	1,490	1,390		
Rate for discounting scheme liabilities (increase or decrease by 0.1%)	1,390	1,480		
Longevity (increase in 1 year)			11,200	
Rate of increase in salaries (increase by 0.05%)			11,800	
Rate of increase in pensions (increase by 0.05%)			58,300	
Rate for discounting scheme liabilities (decrease by 0.05%)				70,100

The weighted average duration of the defined benefit obligation for scheme members in the local government scheme is 18.6 years and the firefighter scheme is 20 years.

Note 39 – Contingent Liabilities

The Authority has no contingent liabilities as at 31st March 2014.

Note 40 – Prior Period Adjustments

Pension Accounting Arrangements

Prior period adjustments have been made to the Authority's 2012/2013 published financial statements in relation to changes to the international accounting standard IAS19 Employee Benefits. This has resulted in changes to the accounting treatment for financial years beginning on or after 1st January 2013. The main changes are as follows:

Expected Return on Assets

This is in relation to the return on Pension Scheme assets held by South Tyneside Pension Fund. Advance credit for anticipated outperformance of return seeking assets (such as equities) is no longer permitted by IAS19. This has been replaced with an equivalent figure calculated using a discount rate (as opposed to using a figure calculated using expected return on asset assumptions).

Asset Disclosures

IAS19 requires a more detailed breakdown of the pension fund assets. The values of the assets, broken down into different classes that distinguish between the nature and risk, now need to be disclosed. A further breakdown is also needed showing those assets which have a quoted market price and those which do not. The disclosure included in the Authority's 2012/2013 published financial statements only showed the main categories of equities, bonds, property and cash as required. As a result of the change some of these categories are split further.

Note 40 – Prior Period Adjustments (continued)

Disclosure Presentation

In order to be consistent with the new requirements of IAS19 the disclosures in relation to the Authority's defined benefit pension scheme have changed from those published in 2012/2013. By making these changes to the accounting standard, it is intended that the presentation of the information is easier for the user to understand.

Impact on 2012/2013 Financial Statements

Throughout the Statement of Accounts, where disclosures have been restated in line with the accounting changes, the 2012/2013 figures have been identified as 'restated'. The impact of these changes on the Authority's 2012/2013 core statements is shown below:

Comprehensive Income and Expenditure Statement

	2012/2013		
	Original £'000	Net Expenditure Restatement £'000	Restated £'000
Community Safety	6,878	780	7,658
Fire Fighting and Rescue Operations	33,768	0	0
Corporate and Democratic Core	238	0	0
Non-Distributed Costs	697	0	0
Cost of Services	41,581	780	42,361
Other Operating Expenditure	(35)	0	(35)
Financing and Investment Income and Expenditure	33,893	620	34,513
Taxation and Non Specific Grant Income	(55,946)	0	(55,946)
(Surplus) or Deficit on Provision of Services	19,493	1,400	20,892
Surplus or Deficit on the Revaluation of Fixed Assets	0	0	0
Actuarial Gains / Losses on Pension Assets / Liabilities	83,710	(83,710)	0
Re-measurements of the Defined Benefit Liability	0	82,310	82,310
Other Comprehensive Income and Expenditure	83,710	(1,400)	82,310
Total Comprehensive Income and Expenditure	103,203	0	103,203

Note 40 – Prior Period Adjustments (continued)

Movement in Reserves Statement

	General Fund Balance	Earmarked GF Reserves	Capital Receipts Reserve	Total Usable Reserves	Unusable Reserves	Total Authority Reserves
	Restated			Restated	Restated	Restated
	£'000	£'000	£'000	£'000	£'000	£'000
Original Balance at 31 March 2013	(3,872)	(28,172)	(3,285)	(35,328)	738,568	703,240

	0	0

Notes to the Firefighters' Pensions Statements

1. Basis of Preparation

The accounts have been prepared in accordance with the Code of Practice on Local Authority Accounting in Great Britain. CIPFA guidance notes for practitioners have also been referred to and applied where appropriate.

The financial statements summarise the transactions of the scheme and the net assets. They do not take account of obligations to pay pensions and benefits which fall due after the end of the scheme year.

2. Accounting Policies

The principal accounting policies are as follows:

Contributions

Contributions represent the total amounts receivable from the Authority and the pensionable employees. The employer's contributions are made at rates determined by the Government Actuaries Department, at a nationally applied rate of 21.3% for the 1992 Firefighters' Pension Scheme (11.0% for employees' contributions), and 11.0% for the 2006 Firefighters' Pension Scheme (8.5% for employees' contributions).

In addition to these contribution payments, the Authority is also required to make payments into the Pension Fund in respect of ill-health retirements, when they are granted.

No provision is made in the accounts for employees' and employer's contributions relating to sums due on pay awards not yet settled.

Benefits and refunds

Benefits and refunds are accounted for in the year in which they become due for payment.

Supplementary Statements (continued)

Transfer values

Transfer values are those sums paid to, or received from, other pension schemes, and the firefighters' pension scheme outside England, for individuals, and relate to periods of previous pensionable employment.

Transfer values received and transfer values paid are accounted for on a receipts and payments basis.

3. Fund's Operations

New financial arrangements came into effect from 1st April 2006 for both the 1992 and the new 2006 firefighters' pension schemes. The new financial arrangements had no impact on the terms and conditions of each scheme.

Both firefighters' schemes are statutory, unfunded pension schemes, with the benefits from both schemes being defined and guaranteed in law. Both schemes are contracted out of the State Second Pension (S2P) and must provide benefits at least as good as most members would have received had they been members of S2P. Benefits provided include a tax-free lump sum and a guaranteed pension based on final salary upon retirement.

Prior to 1st April 2006, the Authority administered and paid firefighters' pensions on a 'pay-as you-go' basis, which meant that employees' contributions were paid into the Authority's operating account from which pension awards were made. Following the change in financial arrangements on 1st April 2006, the Authority has continued to administer and pay firefighters' pensions, but this is now from a new separate local firefighters' pension fund.

Employee contributions and new employer's contributions are paid into the Pension Fund from which pension payments are made. The fund is topped up by Government grant if the contributions are insufficient to meet the cost of pension payments, with any surplus in the fund being recouped by Government. The fund is, therefore, balanced to nil each year by receipt of pension top-up grant or by paying the surplus back to Government. The underlying principle is that employer and employee contributions together will meet the full cost of pension liabilities being accrued in respect of currently serving employees while central Government will meet the costs of retirement pensions in payment, net of employee and the new employer contributions.

The fund has no investment assets.

Glossary of Terms

Accrual

A sum included in the final accounts to cover income or expenditure attributable to an accounting period for goods received or work done, but for which payment has not been received/made by the end date of the period for which the accounts are prepared.

Accounting Policies

Those principles, bases, conventions, rules and practice applied by an entity that specify how the effects of transactions and other events are to be reflected in its financial statements through:

- recognising;
- selecting measurement bases for, and;
- presenting assets, liabilities, gains, losses and changes to reserves.

Accounting policies define the process whereby transactions and other events are reflected in financial statements. For example, an accounting policy for a particular type of expenditure may specify whether an asset or a loss is to be recognised; the basis on which it is to be measured; and where in the revenue account or balance sheet it is to be presented.

Actuarial Gains and Losses

For a defined benefit pension scheme, the changes in actuarial deficits or surpluses that arise because:

- events have not coincided with the actuarial assumptions made for the last valuation (experience gains or losses) or;
- the actuarial assumptions have changed.

Agency Services

Services that are performed by or for other authorities or bodies, where the authority/body responsible for the service reimburses the Authority carrying out the work for the cost of the work carried out.

Assets

Items of worth which are measurable in terms of money (value). Current assets are ones that may change in value on a day-to-day basis (e.g. Inventories). Fixed assets are tangible assets that yield benefit to the Authority and the services it provides for a period of more than one year.

Audit Commission

Is an independent body established by the 1982 Local Government Finance Act, which is responsible for appointing auditors to local authorities.

Balance Sheet

A statement of the recorded assets, liabilities and other balances at a specific date usually at the end of an accounting period.

Balances

The capital or revenue reserves of the Authority made up of the accumulated surplus of income over expenditure on the General Fund or any other fund.

Capital Charge

The charge to the services for the use of fixed assets.

Capital Expenditure

Expenditure on the acquisition of a fixed asset or expenditure which adds to and not merely maintains the value of an existing fixed asset.

Capital Financing Charges

The annual charge to the Comprehensive Income and Expenditure Statement in respect of the minimum revenue provision and interest on money borrowed together with leasing rentals.

Capital Financing Requirement

The capital financing requirement is one of the indicators that must be produced as part of the CIPFA prudential code. This measures the Authority's underlying need to borrow for a capital purpose. In order to ensure that over the medium term net borrowing will only be for a capital purpose, the local authority should ensure that net external borrowing does not, except in the short term, exceed the total of capital financing requirement in the preceding year plus the estimates of any additional capital financing requirement for the current and the next two financial years.

Capital Grants

Grants received towards capital expenditure on a particular service or project.

Capital Receipts

Money received from the sale of land or other capital assets. For non-housing authorities capital receipts are held by the Authority and can be used to pay for any kind of capital expenditure, to repay debt, to meet premiums on early debt repayments and to meet liabilities under credit arrangements.

Class of Fixed Assets

The classes of fixed assets required to be included in the accounting statements are:

Operational assets;

- Land and Buildings;
- Vehicles, Plant and Furniture.
- Surplus Assets

Non-operational assets.

Investment Property

Heritage Assets

Further analysis of any of these items should be given if it is necessary to ensure fair presentation.

Code of Practice on Local Authority Accounting in the UK

'The Code' specifies the principles and practices of accounting to give a 'true and fair' view of the financial position and transactions of the Authority.

Consistency

The concept that the accounting treatment of like items within an accounting period and from one period to the next is the same.

Constructive Obligation

An obligation that derives from an Authority's actions where:

- By an established pattern of past practice, published policies or a sufficiently specific current statement, the Authority has indicated to other parties that it will accept certain responsibilities, and;
- As a result, the Authority has created a valid expectation on the part of those other parties that it will discharge those responsibilities.

Contingent Asset

A contingent asset is a possible asset arising from past events whose existence will be confirmed only by the occurrence of one or more uncertain future events not wholly within the Authority's control.

Contingent Liability

A contingent liability is either:

- (a) A possible obligation arising from past events whose existence will be confirmed only by the occurrence of one or more uncertain future events not wholly within the Authority's control, or;
- (b) As a result, the Authority has created a valid expectation on the part of those other parties that it will discharge those responsible.

Contingencies

Sums set aside as a provision for liabilities which may arise in the future but which cannot be determined in advance.

Corporate and Democratic Core

The corporate and democratic core comprises all activities which local authorities engage in specifically because they are elected, multi-purpose authorities. The cost of these activities are thus over and above those which would be incurred by a series of independent, single purpose, nominated bodies managing the same services. There is therefore no logical basis for apportioning these costs to services.

Council Tax

The form of local taxation operated from April 1993, based on properties.

Credit Ceiling

Is a measure of the difference between the Authority's total liabilities in respect of capital expenditure financed by credit and the provision that has been made to meet those liabilities.

Creditors

Amounts owed by the Authority for goods and services provided where payment has not been made at the date of the balance sheet.

Current Service Cost (Pensions)

The increase in the present value of a defined benefit scheme's liabilities expected to rise from employee service in the current period.

Debt Outstanding

Amounts borrowed to finance capital expenditure that are still to be repaid.

Debtors

Sums of money due to the Authority but not received at the date of the balance sheet.

Deferred Charges

Items of capital expenditure, which do not result in, or remain matched by, tangible fixed assets. Deferred charges are charged to revenue in the year in which the expenditure is incurred or are written down annually over an appropriate period where the expenditure provides a continuing benefit to the Authority.

Defined Benefit Scheme

A pension or other retirement benefit scheme other than a defined contribution scheme. Usually, the scheme rules define the benefits independently of the contributions payable, and the benefits are not directly related to the investments of the scheme. The scheme may be funded or unfunded (including notionally funded).

Defined Contribution Scheme

A pension or other retirement benefit scheme into which an employer pays regular contributions fixed as an amount or as a percentage of pay and will have no legal or constructive obligation to pay further contributions if the scheme does not have sufficient assets to pay all employee benefits relating to employee service in the current and prior periods.

Depreciation

The measure of the cost or revalued amount of the benefits of the fixed asset that have been consumed during the period.

Consumption includes the wearing out, consumption, or other reduction in the useful economic life of a fixed asset, whether arising from use, passage of time or obsolescence through either changes in technology or demand for the goods and services produced by the asset

Discontinued Operations

Operations comprise services and divisions of service as defined in CIPFA's Standard Classification of Income and Expenditure. An operation should be classified as discontinued if all of the following conditions are met:

- The termination of the operation is completed either in the period or before the earlier of three months after the commencement of the subsequent period and the date on which the financial statements are approved;
- The activities related to the operation have ceased permanently;

- The termination of the operation has a material effect on the nature and focus of the local authority's operations and represents a material reduction in its provision of services resulting in either form its withdrawal from a particular activity (whether a service or division of service or its provision in a specific geographical area) or from a material reduction in net expenditure in the local authority's continuing operations;
- The assets, liabilities, income and expenditure of operations and activities are clearly distinguishable physically, operationally and for financial reporting purposes.

Operations not satisfying all these conditions are classified as continuing.

Discretionary Benefits

Retirement benefits which the employer has no legal, contractual or constructive obligation to award and which are awarded under the authority's discretionary powers, such as The Local Government (Discretionary Payments) Regulations 1996, the Local Government (Discretionary Payments and Injury Benefits)(Scotland) Regulations 1998, or the Local Government (Discretionary Payments) Regulations (Northern Ireland) 2001.

Emoluments

All sums paid to or receivable by an employee and sums due by way of expenses allowances (as far as those sums are chargeable to UK income tax) and the money value of any other benefits received other than in cash. Pension contributions payable by either employer or employee are excluded.

Estimation Techniques

The methods adopted by an entity to arrive at estimated monetary amounts, corresponding to the measurement bases selected, for assets, liabilities, gain losses and changes to reserves.

Estimation techniques implement the measurement aspects of accounting policies. An accounting policy will specify the basis on which an item is to be measured: where there is uncertainty over the monetary amount corresponding to that basis, the amount will be arrived at by using an estimation technique. Estimation techniques include, for example:

- Methods of depreciation, such as straight line and reducing balance, applied in the context of a particular measurement basis, used to estimate the proportion of the economic benefits of a tangible fixed asset consumed in a period;
- Different methods used to estimate the proportion of debts that will not be recovered, particularly where such methods consider a population as a whole, rather than individual balances.

Exceptional Items

Material items that derive from events or transactions that fall within the ordinary activities of the Authority and which need to be disclosed separately by virtue of their size or incidence to give fair presentation of the accounts.

Expected Rate of Return on Pension Assets

For a funded defined benefit scheme, the average rate of return, including both income and changes in fair value but net of scheme expenses, expected over the remaining life of the related obligation on the actual assets held by the scheme.

Expenditure

Amounts paid by the Authority for goods received or services rendered of either a capital or revenue nature. This does not necessarily involve a cash payment - expenditure is deemed to have been incurred once the goods or services have been received, even if they have not yet been paid for (in which case the supplier is a creditor of the Authority).

Fees and Charges

Income arising from the provision of services.

General Fund

This accounts for the services of the Authority. The net cost is met by the Council Tax, Government Grants and National Non Domestic Rates.

Going Concern

The concept that the Authority will remain in operational existence for the foreseeable future, in particular that the revenue accounts and balance sheet assume no intention to curtail significantly the scale of operations.

Government Grants

Assistance by government and inter-government agencies and similar bodies, whether local, national or international, in the form of cash transfers of assets to an authority in return for past or future compliance with certain conditions relating to the activities of the Authority.

Impairment

A reduction in the value of a fixed asset below its carrying amount on the balance sheet.

Income

Amounts due to the Authority for goods supplied or services rendered of either a capital or a revenue nature. This does not necessarily involve a cash payment - income is deemed to have been earned once the goods or services have been supplied even if the payment has not been received (in which case the recipient is a debtor to the Authority).

Intangible Fixed Assets

These are non financial fixed assets, such as software licences, that do not have physical substance but are identifiable and are controlled through custody or legal rights.

Interest Cost (Pension)

For a defined benefit scheme, the expected increase during the period is the present value of the scheme liabilities because the benefits are one period closer to settlement.

International Financial Reporting Standards (IFRS) / International Accounting Standards (IAS)

Standards issued by the International Accounting Standards Board (IASB) which present the Authority's accounts in a consistent and comparable format with other Fire and Rescue Services internationally.

Inventories

The amount of unused or unconsumed inventory held in expectation of future use. When use will not arise until a later period, it is appropriate to carry forward the amount to be matched to the use or consumption when it arises. Inventory comprises the following categories:

- Goods or other assets purchased for resale;
- Consumable goods;
- Raw materials and components purchased for incorporation into products for sale;
- Products and services in intermediate stages of completion;
- Long term contract balances;
- Finished goods.

Investments (Pension Fund)

The investments of the pension fund will be accounted for in the statements of that fund. However authorities are also required to disclose, as part of the disclosures relating to retirement benefits, the attributable share of pension scheme assets associated with their underlying obligations.

Investments (Non Pension Fund)

A long-term investment is an investment that is intended to be held for use on a continuing basis in the activities of the authority. Investments should be so classified only where an intention to hold the investment for the long term can clearly be demonstrated or where there are restrictions as to the investor's ability to dispose of the investment.

Investments, other than those in relation to the pension fund, that do not meet the above criteria should be classified as current assets.

Leasing

The method of financing the provision of various capital assets to discharge the Authority's functions outside normal borrowing procedures but within criteria laid down in the Local Authorities (Capital Finance)

Regulations 1990. There are different types of leases available of which the following are most commonly used:

Operating Leases – this is a type of lease, usually computer equipment, office equipment or vehicle where the balance of risks and rewards of holding the asset remains with the lessor. The asset remains the property of the lessor and the lease costs are revenue expenditure to the Authority.

Finance Leases - are leases that transfer substantially all of the risks and rewards of ownership of a fixed asset to the lessee.

Liabilities

Amounts due to individuals or organisations which will have to be paid at some time in the future. Current liabilities are usually payable within one year of the balance sheet date.

Liquid Resources

Current asset investments that are readily disposable by the Authority without disrupting its business and are either: readily convertible to known amounts of cash at or close to the carrying amount, or traded in an active market.

Loans Outstanding

The total amounts borrowed from external lenders for capital and temporary revenue purposes but not repaid at the balance sheet date.

Long Term Contracts

A contract entered into for the design, manufacture or construction of a single substantial asset or the provision of a service (or a combination of assets or services which together constitute a single project), where the time taken substantially to complete the contract is such that the contract activity falls into different accounting periods. Some contracts with a shorter duration than one year should be accounted for as long term contracts if they are sufficiently material to the activity of the period.

Minimum Revenue Provision

Is the minimum amount which must be charged to an authority's revenue account each year and set aside as a provision for credit liabilities, as required by the Local Government Act 1989.

National Non-Domestic Rate (NNDR)

With effect from April 1990 all non-domestic properties were revalued and the Government determines a national rate poundage every year which is applicable to all local authorities. From 1st April 2013, only 50% of the proceeds are pooled and re-distributed by Central Government. The remainder are retained locally, placing risk on the billing authority to collect the business rates income due.

Net Book Value

The amount at which fixed assets are included in the balance sheet, that is their historical cost of current value less the cumulative amounts provided for depreciation.

Net Current Replacement Cost

The cost of replacing or recreating a particular asset in its existing condition and in its existing use, i.e. the cost of its replacement or of the nearest equivalent asset, adjusted to reflect the current condition of the existing asset.

Net Debt

The Authority's borrowings less cash and liquid resources. Where cash and liquid resources exceed borrowings, reference should be to net funds rather than net debt.

Net Realisable Value

The open market value of the asset in its existing use (or open market value in the case of non-operational assets) less the expenses to be incurred in realising the asset.

Non-Operational Assets

Fixed assets held by a local authority but not directly occupied, used or consumed in the delivery of services or for the service or strategic objectives of the authority. Examples of non-operational assets include;

investment properties and assets that are surplus to requirements, pending their sale. It should be noted that the incidence of rental income does not necessarily mean that the asset is an investment property; it would be deemed an investment property only if the asset is held solely for investment purposes and does not support the service or strategic objectives of the authority and rental income is negotiated at arms length.

Operational Assets

Fixed assets held and occupied, used or consumed by the local authority in the direct delivery of those services for which it has either a statutory or discretionary responsibility or for the service or strategic objectives of the authority.

Past Service Costs

For a defined benefit scheme, the increase in the present value of the scheme liabilities related to employee service in prior periods arising in the current period as a result of the introduction of, or improvement to, retirement benefits.

Post Balance Sheet Events

Those events, both favourable and unfavourable, which occur between the balance sheet date and the date on which the Statement of Accounts is signed by the responsible financial officer.

Precept

The amount levied by the Tyne and Wear Fire and Rescue Authority which is collected by the Tyne and Wear District Councils on their behalf.

Prior Period Adjustments

Those material adjustments applicable to prior periods arising from changes in accounting policies or from the correction of fundamental errors. A fundamental error is one that is of such significance as to destroy the validity of the financial statements. They do not include normal recurring corrections or adjustments of accounting estimates made in prior periods.

Projected Unit Method

An accrued benefits valuation method in which the scheme liabilities make allowance for projected earnings. An accrued benefits valuation method is a valuation method in which the scheme liabilities at the valuation date relate to:

- The benefits for pensioners and deferred pensioners (i.e. individuals who have ceased to be active members but are entitled to benefits payable at a later date) and their dependants. Allowings where appropriate for future increases, and;
- The accrued benefits for members in service on the valuation date.

The accrued benefits are the benefits for service up to a given point in time, whether vested rights or not. Guidance on the projected unit method is given in the Guidance Note GN26 issued by the Faculty and Institute of Actuaries.

Provisions

These are sums set aside to meet liabilities or losses which it is anticipated will be incurred but where the amount and / or the timing of such costs are uncertain.

Private Finance Initiatives (PFI)

PFI's are method of funding/acquiring assets such as schools, but the supplier of the building is usually an agreed contractor or bidder, usually over a 25 year term. The Authority pays for the use of the asset by means of a unitary charge and can acquire the asset after this term if included in the terms of the contract. Up until this point the Authority does not own the asset and simply pays for the use of the asset. Government grant is available to assist authorities who enter into these arrangements, however, known as PFI credits. These have a direct impact upon the level of government grant paid each year to help pay for the scheme.

Prudence

The concept that revenue is not anticipated but is recognised only when realised in the form of cash or of other assets, the ultimate cash realisation of which can be assessed with reasonable certainty.

Prudential Framework

One of the principal features of the Local Government Act 2003 was to provide the primary legislative requirements to introduce a new prudential regime for the control of Local Authority capital expenditure. The regime relies upon both secondary legislation in the form of regulations, and a prudential code which has been published by the Chartered Institute of Public Finance and Accountancy (CIPFA).

Under the prudential framework local authorities are free to borrow without specific government consent if they can afford to service the debt without extra government support. The basic principle is that authorities will be free to invest as long as their capital spending plans are affordable, sustainable and prudent. As a control mechanism to ensure this occurs all authorities must follow the prudential code published by CIPFA. This involves setting various prudential limits and indicators that must be approved by the Authority before the start of the relevant financial year as part of their budget setting process.

Public Works Loan Board (PWLB)

A Central Government agency, which lends money to Local authorities at lower interest rates than those generally available from the private sector. Local Authorities are able to borrow a proportion of their requirements to finance capital spending from this source.

Related Parties

Two or more parties are related parties when at any time during the financial period:

- One party has direct or indirect control of the other party, or;
- The parties are subject to common control from the same source, or;
- One party has influence over the financial and operational policies of the other party to an extent that the other party might be inhibited from pursuing at all times its own separate interests, or;
- The parties, in entering a transaction, are subject to influence from the same source to such an extent that one of the parties to the transaction has subordinated its own separate interests.

Related Party Transaction

A related party transaction is the transfer of assets or liabilities or the performance of services by, to, or for, a related party irrespective of whether a charge is made. Examples of related party transactions include:

- The purchase, sale, lease, rental or hire of assets between related parties;
- The provision by a pension fund to a related party of assets or loans, irrespective of any direct economic benefit to the pension fund;
- The provision of a guarantee to a third party in relation to a liability or obligation of a related party;
- The provision of services to a related party, including the provision of pension fund administration services;
- Transactions with individuals who are related parties of an authority or a pension fund, except those applicable to other members of the community or the pension fund, such as Council Tax, Rents and payable of benefits.

Reserves

These are sums set aside to meet possible future costs where there is no certainty about whether or not the costs will actually be incurred.

Residual Value

The net realisable value of an asset at the end of its useful life. Residual values are based on prices prevailing at the date of the acquisition (or revaluation) of the asset and do not take account of expected future price changes.

Retirement Benefits

All forms of consideration given by an employer in exchange for services rendered by employees that are payable after completion of employment. Retirement benefits do not include termination benefits payable as a result of either:

- An employer's decision to terminate an employee's employment before the normal retirement date, or;
- An employee's decision to accept voluntary redundancy in exchange for those benefits, because

these are not given in exchange for services rendered by employees.

Revenue Balances

These are the accumulated surpluses on the General Fund. They can be applied to reduce borrowing, reduce the Council Tax, or held to be applied in future years.

Revenue Contributions

The method of financing capital expenditure directly from revenue. The Authority may determine that certain capital schemes should be financed in this way or alternatively may include a prescribed sum in the revenue budget for this purpose.

Revenue Expenditure

Expenditure incurred on the day to day running of the Authority, the costs principally include employee expenses, capital financing charges and general running costs.

Revenue Support Grant (RSG)

A grant paid by Central Government to every Local Authority to help to finance its expenditure generally and not specific services. The grant helps to bridge the gap between Council Tax and NNDR income on one hand and the total assessment of the Authority's need to spend on the other. The payment of RSG attempts to ensure that differences in spending needs and resources between authorities are equalised, in order to permit each authority to support a standard level of spending.

Scheme Liabilities

The liabilities of a defined benefit scheme for outgoings due after the valuation date. Scheme liabilities measured using the projected unit method reflect the benefits that the employer is committed to provide for service up to the valuation date.

Service Reporting Code of Practice (SeRCOP)

The CIPFA Service Reporting Code of Practice (SeRCOP) replaced the previous Best Value Accounting Code of Practice (BVACOP). SeRCOP applies to all Local Authorities from the 1 April 2013 for the preparation of budgets, performance indicators and Statement of Accounts. The aim of SeRCOP is to establish proper practice with regard to consistent financial reporting for services.

Settlement

An irrecoverable action that relieves the employer (or the defined benefit scheme) of the primary responsibility for a pension obligation and eliminates significant risks relating to the obligation and the assets used to effect the settlement. Settlements include:

- a lump-sum cash payment to scheme members in exchange for their rights to receive specified pension benefits;
- The purchase of an irrecoverable annuity contract sufficient to cover vested benefits, and;
- The transfer of scheme assets and liabilities relating to a group of employees leaving the scheme.

Specific Grants

Government grants to Local Authorities in aid of particular services, e.g. community fire safety.

Total Cost

The total cost of a service or activity includes all costs, which relate to the provision of the service (directly or bought in) or to the undertaking of the activity. Gross total cost includes employee costs, expenditure relating to premises and transport, supplies and services, third party payments, transfer payments, support services and capital charges. This includes an appropriate share of all support services and overheads, which need to be apportioned.

Trading Account

The term is used to cover activities previously known as Direct Labour Organisations (DLOs), established under the Local Government, Planning and Land Act 1980, and Direct Service Organisations (DSOs) established under the Local Government Act 1988.

Unapportionable Central Overheads

These are overheads for which no user benefits and should not be apportioned to services.

Unsupported Borrowing

Under the Prudential Framework, the facility to undertake what is known as 'unsupported borrowing' is available. This is borrowing to fund capital expenditure where no support or provision is made by the government to fund this borrowing. In deciding upon whether to undertake unsupported borrowing regard is required to be had to:

- The prudential indicators which are designed to assess whether capital investment needs are affordable, sustainable and prudent;
- The effect on the revenue budget of any additional costs incurred.

Useful Life

The period over which the Authority will derive benefits from the use of a fixed asset.

Vested Rights

In relation to a defined benefit scheme, these are:

- For active members, benefits to which they would unconditionally be entitled on leaving the scheme;
- For deferred pensioners, their preserved benefits;
- For pensioners, pensions to which they are entitled.

Vested rights include where appropriate the related benefits for spouses or other dependants.
