Please Note:

- The BCF end of year reports are categorised as 'Management Information' and data from them will published in an aggregated form on the NHSE website. This will include any narrative section. Also a reminder that as is usually the case with public body information, all BCF information collected here is subject to Freedom of Information requests.

- At a local level it is for the HWB to decide what information it needs to publish as part of wider local government reporting and transparency requirements. Until BCF information is published, recipients of BCF reporting information (including recipients who access any information placed on the BCE) are prohibited from making this information available on any public domain or providing this information for the purposes of journalism or research without prior consent from the HWB (where it concerns a single HWB) or the BCF national partners for the aggregated information.

- All information will be supplied to BCF partners to inform policy development.

 This template is password protected to ensure data integrity and accurate aggregation of collected information.

Better Care Fund 2022-23 End of Year Template 6. Year-End Feedback

The purpose of this survey is to provide an opportunity for local areas to consider and give feedback on the impact of the BCF. There is a total of 5 questions. These are set out below.

Selected Health and Wellbeing Board: Sunderland

Part 1:	Deliv	er	y oi	the	Bette	er C	are	e Fi	und				

Statement:	Response:	Comments: Please detail any further supporting information for each response
 The overall delivery of the BCF has improved joint working between health and social care in our locality 		The BCF arrangements in Sunderland continued to enable us to maintain the strong partnership working in the City and afford us opportuntly to build on successes and address challenges collectively.
2. Our BCF schemes were implemented as planned in 2022-23	Neither agree nor disagree	Work was delivered as expected within planned schemes, although these have been adjusted throughout the period along with the finance to support key areas identified as a priority linked to changing demand and the need to support key areas that could support out of hospital discharge including intermediate bed based services, and supporting sustainbility in
3. The delivery of our BCF plan in 2022-23 had a positive impact on the integration of health and social care in our locality	Agree	The BCF plan continues to support our local integration and offers us further opportunity in the coming years, including: the expansion of shared care records with providers; scaling-up of assistive technology across the system building upon a falls prevention strategy and targeted frailty approach.

Part 2: Successes and Challenges Please select two Enablers from the SCIE Logic model which you have observed demonstrable success in progressing and two Enablers which you have experienced a relatively greater degree of challenge in progressing. Please provide a brief descriptic

on alongside

 Outline two key successes observed toward driving the enablers for integration (expressed in SCIE's logical model) in 2022-23 	SCIE Logic Model Enablers, Response category:	Response - Please detail your greatest successes	
Success 1	 Integrated electronic records and sharing across the system with service users 	We continue to build upon our success in implementing and using a shared care record across they system. We are now working with providers to support them to implement a digital social care record which will contribute to the expansion of the shared care record, supporting more person-centred and coordinated care and delivering improved patient experience and service effectiveness.	
Success 2	 Strong, system-wide governance and systems leadership 	Strong system-wide governance continues in Sunderland, supporting effective use of resource and improved coordination of Care. Local governance arrangements include an established surge group which provides senior-leadership support to the system during times of significant pressure, ensuring the best use of local resources and helping to eliminate duplication, reduce delays and improve service user flow.	

and then detail any further supporting information in the corresponding comment boxes

Checklist Complete:

5. Outline two key challenges observed toward driving the enablers for integration (expressed in SCIE's logical model) in 2022- 23	SCIE Logic Model Enablers, Response category:	Response - Please detail your greatest challenges	
Challenge 1	1. Local contextual factors (e.g. financial health, funding arrangements, demographics, urban vs rural factors)	We continue to face workforce challenges across the system impacting available resource across the Health and Social Care market which in turn creates challenges in flow. Residents continue to present with more complex needs, now exacerbated by the cost of living crisis and the assoicated impact on people's ability to keep themselves safe and well.	Yes
Challenge 2	6. Good quality and sustainable provider market that can meet demand	Whilst the provider market in Sunderland remains high-performing and good quality, the impact of Covid and workforce issues within the provider market has seen challenges in capacity to meet presenting need - particularly in the homecare market within the City. Strong and positive relationships continue with the market to seek innovative ways of addressing these challenges including: development of direct payment/personal health budget grants; support for recruitment; enabling tech developments; increased use of data and reporting; and financial support	Yes

Footnotes:

- Question 4 and 5 are should be assigned to one of the following categories:
- 1. Local contextual factors (e.g. financial health, funding arrangements, demographics, urban vs rural factors)
- 2. Strong, system-wide governance and systems leadership
- 3. Integrated electronic records and sharing across the system with service users
- 4. Empowering users to have choice and control through an asset based approach, shared decision making and co-production
- 5. Integrated workforce: joint approach to training and upskilling of workforce
- 6. Good quality and sustainable provider market that can meet demand
- 7. Joined-up regulatory approach
- 8. Pooled or aligned resources
- 9. Joint commissioning of health and social care
