### 2 Data and Intelligence

Guidance for this section

#### 2.1 What data and intelligence has informed the activity?

UK Government legislative expectations regarding waste recycling requirements being placed upon businesses and other organisations that produce residual waste.

#### 2.2 Summary of data / intelligence / consultation outcomes to inform understanding of differences in:

the way people use, access or experience your activity;

Eliminate discrimination, harassment and victimisation

- how the activity may impact; and/or
- outcomes for different groups?

The introduction of charge-by-weight model for residual waste will seek to increase the operating surplus of SCC's Trade Waste Service by ensuring fairer pricing of those businesses that seek to improve their recycling performance and therefore lower the waste disposal costs for SCC Trade Waste Service. The introduction of improved recycling options (including source segregation of fibre, and glass material streams) will allow SCC Trade Waste Service to better preserve the quality of recycled materials and help increase their value at resale following sorting/ processing.

The service changes will seek to increase the number of trade waste customers who subscribe to SCC's trade waste recycling services (currently estimate approximately 1/5th of customer base), helping businesses become more sustainable. The recycling service will seek to preserve the 'quality' of vulnerable recycling components like fibre (cardboard) so that it can be recycled and reused for longer in the supply chain. The service will seek to develop business food waste solutions for business customers in-line with UK Government legislative requirements and expected timescales when these are confirmed.

#### 6.9 Outline how you will measure the anticipated impact(s)

Number of businesses subscribing to recycling service. Tonnages of recycling diverted from residual waste disposal solution.
